THE WEATHER

Partly cloudy tonight and Wednesday. Little change in temperature.

VOLUME XV

THE CLEARFIELD PROGRESS, CLEARFIELD, PA., TUESDAY EVENING OCTOBER 19, 1920

NUMBER 66

ENFORCEMENT OFFICER AT PITTSBURG FIRED: FALLING DOWN ON THE JOB

PITTSBURGH, October 19—J. W. Connors, prohibition agent in charge of this district was removed from office today on order brought here by Leo A. Crossen, supervising director of the dry enforcement law in New York, New Jersey, Pennsylvania and Delaware. Removal of Connors followed protest from John Kramer, Prohibition Commissioner, that illicit sale of liquor was not being curbed.

CHICAGO BANDIT GETS \$20,000 IN HOLD UP OF LONE BANK MESSENGER

CHICAGO, October 19—Three bandits obtained \$20,000 in cash and \$50,000 in negotiable bonds here when they held up Carl Maurer, a bank messenger today. Maurer had just left a suburban institution with the money for a downtown bank when held up. A policeman usually accompanied the messenger but the police was late and Maurer decided to go alone. No trace of the robbers could be found and Maurer was unable to give a good description of them.

WILL GO BACK FIVE YEARS IN PROBE OF CROOKEDNESS IN BASEBALL

CHICAGO, October 19—Investigation of base ball as far back as 1917 will be taken up by the Cook county grand jury here today. John A. Heydler, president of the National League, was to appear and bring with him records of base ball played by the National League. Heydler said he would present evidence of games played in 1917 in which Hal Chase, New York's first baseman, played and who was found guilty of gambling.

HARDING WILL WAGE STRENUOUS CAMPAIGN IN HOME STATE OF OHIO

MARION, Ohio, October 19—The last week of Senator Harding's campaign will be spent in a tour of Ohio, it was announced today. He will make set speeches in Cincinnati, Cleveland, Columbus, Canton and other cities and make rear platform speeches in a number of small towns. Harding will then rest for a few days before going on his eastern trip to Buffalo and Rochester.

BOLD HOLD UP NEAR BEAVER FALLS

BEAVER FALLS, Pa., October 19—Held up by men believed to be in search of liquor Joe Goldberg aged 35, of Cleveland, Ohio, is reported dying in a local hospital and Can Arovitch, of Cleveland, his companion is being detained by police here. According to the story the men who were driving from Pittsburgh were held up by men in another automobile. Goldberg was robbed of \$1,000.

WE'RE GOING TO GET A NEW SUIT

CHICAGO, October 19—Retail clothiers throughout the country are determined to sell at cost according to Andreas Burkhardt, President of the National Association of Retail Clothiers. "Outrageous prices in the past few years have brought consumers to a state where they will not use reason and so clothing dealers are determined to sell without their usual profits," Burkhardt said.

CONFISCATE \$25,000 TRUCK LOAD OF WHISKEY

PITTSBURGH, Pa., October 19—Twenty-five barrels of whiskey valued at \$25,000 was confiscated by federal authorities when they seized two trucks here last night. Four men on the trucks were released on \$1,500 bail but failed to appear for a hearing today.

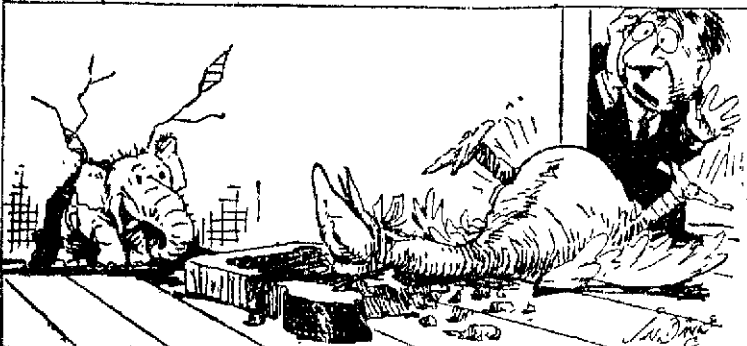

DOCTORS "INSULTED" WOMAN

A physician was called to a farm near Frankfort Heights today and when he arrived found quite a crowd of the neighboring women present offering condolence, a tanager, etc. The woman running up to the doctor as he was leaving his car, said: "She was taken suddenly sick with a tanager poisoning and four other doctors came to the house and insulted her and I am humiliated because very much." They decided she had eaten some tanager and so they gave her a hypothetical infection of a tanager that would destroy the tanager but she didn't seem to be improved and was soon in a state of collapse.

REV DIXON HAS PROSPEROUS YEAR.

Rev. J. W. Dixon of the Allen M. E. church closed the first year of his pastorate in Clearfield and left today for conference at Pittsburgh. Rev. Dixon has made a distinct success of the work of his church during the year. The membership has doubled, while the total revenues raised for the support of the church amounted to more than \$2,500, which was also more than double the previous year's revenues. Rev. Dixon plans to dispose of the present Third Ward property and remove the church to another section of the town at the conference returns here to Clearfield. He has made many friends during his residence here and will be welcomed back.

CANNOT CHANGE DETOUR TO DUBOIS, SAYS SOLICITOR

When state road building begins in this section next spring the official detour between Clearfield and DuBois will likely be over the mountain via the old Penfield pike. For some time interested persons have been behind a movement to have the county commissioners take over a road or route leading from the Home Camp and Winterburn pike at a point northeast of the Elias Linniger farm and extending some three miles east to a point on the Penfield pike at the farm of Frank Johnson.

This proposed road would shorten the distance between Clearfield and DuBois considerably it is claimed. The matter of the proposed change was put up to the commissioners by petition, which petitions were referred to the county solicitor, who advises the commissioners that they have no right under the law to make such change. Solicitor Woodward's opinion in the matter follows:

To the Commissioners Clearfield, Pa. Gentlemen: I have received from you petition of various citizens of Huston township and elsewhere praying the county commissioners to take charge of a certain road leaving the Home Camp and Winterburn Pike at the point northeast of the Elias Linniger farm and extending a distance of three miles in an easterly direction to a point on the Penfield and Clearfield Pike at the farm of Frank Johnson; said road being situated in Pine township.

It is alleged in said petition that the proposed route is a much shorter route between DuBois and Clearfield than the one now in use and a much more convenient one for the traveling public now and as long as the State Highway between DuBois and Clearfield shall be closed in whole or in part for reconstruction; also praying that the road from DuBois to Home Camp thence to the Elias Linniger farm and thence to the Penfield and Clearfield road be made and set aside as a detour from DuBois to Clearfield. In this matter I beg to advise:

1st: That the only construction

now upon the State Road between DuBois and Clearfield that involves detours is first, that part of the road between Clearfield and Curwensville, and second, a part of the road from near Salem, and past Luthersburg. In both of these cases detours were established last spring and are being maintained so that there is now no necessity for any other detours to replace the state road between Clearfield and DuBois.

2nd: That the road proposed as a detour can not be so established in view of the facts stated in the first paragraph, or can not be so established at least at this time. When the state undertakes to reconstruct the road from Luthersburg to Gramplan it may be necessary to establish a detour connecting DuBois to Clearfield. This however, is in the future and it may be a year or more before any action ought to be taken in this respect.

3rd: In establishing detours for state highways the County Commissioners must consider the needs of the general traveling public and not the needs or wishes of any particular locality or individuals. In establishing a detour between DuBois and Clearfield regards must be had for the accommodation of the greatest number of people who constitute the traveling public and who formerly used the route to be replaced. When the time comes in the future to establish a detour between DuBois and Clearfield I am sure that the Commissioners will take the matter up and consider it on broad general lines and in accordance with the welfare and best interests as well of the county as of the traveling public. I would advise the persons active in this project to the effect that no additional detours are needed at the present time on the road from DuBois to Clearfield and that when the time comes that such detour or detours are needed, due consideration will be given to the petition filed with the Commissioners.

I return herewith to you the petition for filing.

Yours very truly,
A. H. WOODWARD

STOCK PRICES

NEW YORK, Oct. 19.—Twelve o'clock prices on the stock exchange today were: American Locomotive, 95; Baldwin Locomotive, 117 1/2; B. & O., 47 1/2; Bethlehem Steel, 70 1/2; Crucible Steel, 129 1/2; Erie, 18 1/2; Erie 1st pref., 28 1/2; Erie 2d pref., 20 1/2; General Motors, 18; General Electric, 141; Mexican Petroleum, 190 1/2; Maytag, 38; Penna., 4 1/2; Republic Iron and Steel, 76 1/2; Sinclair Oil, 10 1/2; United States Steel, 87 1/2; United States Steel, pref., 109; Westinghouse Electric, 46 1/2.

MARRIED AT WEST SIDE PARSONAGE

William G. Rees, a well known Third Ward resident, and Mrs. Celia English, of Snamamoning, Pa., were united in the holy bond of wedlock at the West Side Methodist parsonage yesterday afternoon by Rev. C. C. Smiley. They will reside in Clearfield.

Edna Turner, Jim Polkman and George Dougherty have returned from a tour to P. L. Chapman.

BOYS SCOUTS WILL HAVE PERMANENT SUPPORT SOON

Through the men of Clearfield who are interested in our boys the Boy Scout movement is to receive a boost. For sometime Scouting has been attempted in this locality with the result that there are four troops now in existence. It has been felt by those at the head of the work that it is necessary, for the betterment of the scouts, and the increase of interest in the movement, to form a council and thus head up the work for the entire community.

A second class council will be formed which assures a local headquarters, a scout commissioner and a summer camp. All business will be done through the local headquarters.

There will be a meeting of all men interested on Friday evening at 8 o'clock at the Y. M. C. A. at which time Arthur A. Schuck, national field executive for the Third district, which includes the State of Pennsylvania, will be present to explain the work and assist in the organization of the council.

All men interested in the welfare of our boys and anxious for their betterment are invited and urged to be present at this meeting.

NOW, WHO THE "DILV" IS MURPHY

Clearfield women are beginning to take real interest in politics. A couple of Second Ward women were swapping gossip one day last week and after having exhausted the community small talk, began a political discussion.

Woman No. 1 opened the debate with "How are you going to vote Mrs. B.?"

Mrs. B. responded with "I am going to vote for Harding; I used to be a Democrat, but am going to vote Republican this time."

Mrs. C. then replied, "Well, I can't see why any person who had been a Democrat could even think of voting for Harding against a man like Governor Cox."

Mrs. B. then said: "Well, look at Murphy."

Mrs. C. Who is Murphy?

Mrs. B. "Well, now, I really don't know, but read in the North American that he was a bad man and he is for Cox. Do you know who he is?"

Mrs. C. "No, I do not, but I am going to find out."

That ended the discussion. The story leaked out when Mrs. C. sought information concerning "Murphy" from a better posted sister politician.

But isn't that so like the dear creatures? Wonder what these women voters really will do. All the politicians are at sea over the answer.

MICKIE SAYS

HOW DO YOU LIKE THIS POSE GANG? SEE GOSH, I LOOK THIS WAY EVERY TIME SOMEBODY PAYS THEIR SUBSCRIPTION! IF YA DON'T WANT ME TO LOOK LIKE TH' "WIRELESS" OF TH' HESPERUS" ER TH' BUSTIN' UP OF A HARD WINTER DON'T NEGLECT HER SUBSCRIPTION!

DO NOT FORGET

THE SPEAKING

AT THE

HARDING CLUB

TONIGHT

HE VOLUNTARILY GAVE ALL HE COULD SPARE TO HOSPITAL

Yesterday a man walked into the hospital campaign headquarters in the M. S. building and displayed two checks. One was for \$40 for a doctor's bill. The other was for \$15 for the Clearfield hospital maintenance, endowment and building fund. "The \$40 bill hits me a considerable wallop," he said, "but even at this time I don't want to miss this opportunity to do a little something for the Clearfield hospital which has done so much for me and mine in the past—at a time when its help was needed. So here's my check for \$15, and I'm going to give more as soon as I can spare it."

That is the attitude toward the hospital campaign which is being displayed everywhere in the borough of Clearfield. Nevertheless, the people of Clearfield county are slow in getting "on the job" and in other places are not supported by a sufficient number of co-workers. The careful and systematic preparation and organization achieved by the campaign executive committee and others have resulted in a condition wherein it might be said the people of the county have the money right in their palms, ready and willing to hand it over; but—somebody must go after it and lift it from those palms. So "dig in" all you county teamworkers; turn out in sufficient numbers to visit every little cottage on every byway, and help send the fund to provide your county with adequate hospital service toward the goal.

The largest subscription yesterday came from the Helmbold & Stewart Insurance company of Clearfield, which agreed to contribute \$100 in insurance premiums as needed by the hospital. The Bigler district reported about \$1,000 raised and "going strong;" and other reports are beginning to come in from various points in the county.

"Y" PHYSICAL DIRECTOR ARRIVES

John F. Rau the new physical director for the Y. M. C. A. arrived in town on Friday evening and is getting acquainted with the people and the work. Mr. Rau comes to us from Allentown after two and a half years' experience in the work in the association there.

The work of remodeling the gymnasium will be done between now and the first of November and it is hoped to have the classes begin the first week of next month.

A schedule is being arranged and will be announced in the Progress within a few days.

NEW TERRITORY WILL BE ADDED TO BOROUGH

Ogden Avenue Property Owners Petition Council To Admit Them To City

POLICEMEN ARE ELECTED

A meeting of Town Council, held in the Borough building last evening, was presided over by President Fletcher, was a particularly busy one and much business of interest to the taxpayers generally was disposed of.

Treasurer Wright's report showed healthy balances in the different funds of council while Tax Collector Taylor reported collections of \$2,000 during the month.

The police problem was solved by the election of P. A. Hitt as chief of police and H. S. Brink, patrolman. The women are from Philipsburg. The police has been acting chief of the past month and has given general satisfaction. Mr. Brink is the son of Chief of Police Brink of Philipsburg, and comes here highly recommended.

Solicitor Urey reported collections of \$97.56 since last report and presented check for same. He also presented an ordinance fixing the salary of the Chief of Police at \$140 per month and assistant or patrolman at \$125 per month. This ordinance was unanimously adopted.

Several weeks ago a petition was received from a number of property owners in Lawrence township, whose properties adjoined the borough in the Ogden avenue section in which they asked to be annexed to the borough. The matter was presented by Clarence Kramer, Esq., and was referred to the borough solicitor as to the legal procedure in such cases. The solicitor reported that when a section of township territory desired to be annexed to the borough all that was necessary was a petition to council signed by a majority of the property owners in the region affected. When the petition was presented council could, if it was considered desirable, prepare and pass an ordinance pursuant to section 150 of article I, chapter 3, of the general Borough Act of 1915, and the annexation could then be accomplished on the passage of the ordinance.

The ordinance providing for the annexation of the territory mentioned was presented and unanimously adopted and the annexation will be an accomplished fact coincident with the publication of same, the expense incident to the proceeding being borne by the property owners affected.

Notice to build sidewalk in front of his property upon Turnpike avenue, to connect the line of walks to the hospital, was ordered served on Edward Billotte.

The following resolutions recently adopted by the Board of Health, were read to council:

"Resolved, that we, the Board of Health of Clearfield Borough hereby decree, that through street sewer to be a public nuisance and hereby direct council to take immediate steps to abate this nuisance without further delay.

2nd. Resolved, that we, the Board of Health request that Council extend the Bigler avenue sewer from 6th to 4th street in order that we may direct the Elk Tannery Co. to remove their 20 outside closets and install sanitary closets to be turned into Bigler avenue sewer.

We request that council and the Sts., and for which we propose to have sewers to receive the sewerage is now emptying into Orr's Run in the region of Williams and West, and for which, we are reliably informed no sewer exists.

CLEARFIELD BOARD OF HEALTH

The Sewer Committee was directed to look after these propositions; and report at next meeting.

The Street Committee was directed to get after the Pennsylvania Railroad and have them complete their work on Third street, as the present condition of their tracks was a menace to pedestrians having to travel over some of the different crossings.

Dr. and Mrs. Dale and daughter of Philipsburg spent yesterday in town. Mrs. Ernest Caplinger and son Ernest who live in Elkins, West Va., are visiting at the home of William Reece on West Front St. Mr. Reece is a brother of Mrs. Caplinger. Cedric Hill of Jersey Shore has returned to his home after spending several days here.

LEGAL Intelligence

ADMINISTRATRIX SALE.

Notice is hereby given that the undersigned administratrix of the estate of Isaac Undercoffer, late of the village of Bigler, Bradford Township, Clearfield County, Pa., deceased, will make application to the Orphans' Court of Clearfield County on Monday the 25th day of October, 1920, at 9:30 o'clock, A. M., for a decree authorizing and empowering the said Administratrix to sell at private sale for the payment of debts all the following described real estate:

All that certain lot of ground situated in the village of Bigler, in Bradford Township, Clearfield County, Pennsylvania, bounded and described as follows: Beginning at the Southwest corner of lot No. 3 in the plan of said village and the State Road leading from Clearfield to Phillipsburg, known as Clearfield street; thence running Northeast along said road sixty (60) feet, more or less, to corner of lot of G. B. Thompson; thence Northeast along said lot of G. B. Thompson sixty (60) feet to a corner; thence along lot of said G. B. Thompson Southeast forty-eight (48) feet to lot of Mrs. Thomas Stevens; thence Northeast along lot of said Mrs. Thomas Stevens one hundred forty (140) feet, more or less, to lot of ——— Kyler; thence Northwest along said lot of ——— Kyler one hundred twenty (120) feet to an alley; thence Southwest along said alley one hundred sixty-five (165) feet to state road and place of beginning, having hereon erected a two-story frame dwelling and outbuildings.

Also, one other parcel of land adjoining the above being the rear corner of lot No. 2, and being about fifty-five (55) feet in width and one hundred forty (140) feet in length.

Unless objections are filed on or before said date, after decree is entered sale will be made by W. H. Albert for the sum of fifteen hundred dollars.

ALELIA A. GULICH, Administratrix.
Kraemer & Kraemer, Attorneys.

GOVERNOR SPROUL SAYS WOMEN NOT IN FAVOR OF COX

"Women voters are not for Cox," says Governor Sproul of Pennsylvania and the reasons are not far to find. Governor Cox has alienated the affections of great masses of American women. In the first place, it is generally conceded that his intimate friends knew that in his heart he did not want woman's suffrage and that his statements in favor of this measure were only for political effect.

There are a great many travelling men in this country. They are, as a class, constructionists of a high order. Their intelligent optimism has often held a merchant up past the breaking point helping save his business. These travelling men have devoted wives; the most of them take a great interest in what their husbands are doing. Cox lost what friends he may have had among these good people by his amazingly stupid attack on commercial travelling and the travelling man.

The Text.

"Mabel is engaged to a young man. She's not on her vacation." "That so?" "When is the wedding to be?" "She doesn't know that. She's got to wait and see whether or not he's going to wait to her. It may be that he'll just forget about it, you know."

WIDOW OF ROOSEVELT URGES ELECTION OF WARREN G. HARDING

In Statement Declares Country's Vital Need Is Victory for Republican Candidates.

FIRST BACK OWN COUNTRY.

Says Opportunity Has Come to Women to "Make Her Influence Mighty in Behalf of Nation."

Oyster Bay, N. Y.—Mrs. Edith Kermit Roosevelt, widow of Colonel Theodore Roosevelt, is evincing keen interest in the Republican campaign. She recently gave to the press the following statement urging the election of Harding and Coolidge:

"The country's vital need is the election of the Republican candidates.

MRS. EDITH KERMIT ROOSEVELT.

Warren G. Harding and Calvin Coolidge. Only will the full measure of Americanism in the next Administration be attained, if the people shall declare for the party which holds true nationalism as its high ideal. It is not necessary to forget our duty to our neighbor in doing our duty at home.

"The time appeals most strongly to the manhood and the womanhood of America. To woman more than ever before because to her has come the perfected opportunity to make her influence weighty in behalf of the nation. This year as never before, with world conditions as they are, steadiness and staunchness of American purpose are obligatory if we would first bring back our country to its stable place and then by strong endeavor do all that can be done for peace and the general welfare in all lands."

REPUBLICANS INSURE ECONOMICAL CONDUCT

Washington.—Not one man in ten thousand realizes the enormous expenses run up by the present Government. The disbursements are roughly \$15,000,000 a day, more than a year after the war. In 1914 the people expostulated because the daily disbursements by the Treasury had reached \$2,000,000. How gladly would the people grudging under the impositions of profiteers and the burden of taxes welcome a return to these halcyon days? Congress and the new Administration will have to deal with the reduction of Government expenditures.

The same party that has swelled them returned to power will never reduce them, because it claims the government is being economically administered. The Republican party will delight in reducing these enlarged expenses for clerk hire, and the insatiable bureaus that have been built up into money spending machines. By holding in their hands all lines of expenditures the new Congress and new Executive working together will cut down excessive items and eliminate others to an aggregate of hundreds of millions of dollars.

NATION DEMANDS THOROUGH CHANGE.

Chicago, Oct. 19.—If one were required to name a single factor which is doing more than any other to work toward Republican success in November, he would probably have to say: Determination of the public to have a change and to get away from Wilsonism.

Reports from all quarters tell of this feeling, at once a desire for a change and a determination to bring it about at the polls November 2.

Whether it be from the central west, the far west, the east or the south, the reports tell of this seeking for a change. The desire for a change is born of dissatisfaction, dislike and disgust felt by the voters toward the Wilson administration and the things it has done and left undone.

Mr. Cox is looked on as a man who if he were elected would follow the track of Mr. Wilson. In fact, he has declared himself in "complete accord" with Mr. Wilson.

The public, by all accounts, is not looking for a man who will go along with Mr. Wilson or the Wilson policies.

Mr. and Mrs. R. M. Hanes spent Sunday with friends in State College. Miss Dolly Lockard of Houtzdale spent the week end with friends here.

When Shall I Buy My Winter's Bedding? Where Shall I Buy My Winter's Bedding?

We can answer both questions—and, we believe—our answer will prove the best and most satisfactory solution to your bedding problem.

When? NOW! This week quantities are greater than we may expect them to be later on. Buy now and choose from full stocks while there's ample to offer varied choosing.

Where? ROSS & WOODS! Because you have the assurance that whatever you buy here will be good—and worth whatever you pay. We also have some very good reasons to believe that you may buy some mighty good blankets and comforters for as little as you'd pay elsewhere. We KNOW you won't have to pay more, so again we say—

BUY BEDDING THIS WEEK—BUY IT AT ROSS & WOODS!

at \$3 Pr.

These are a light weight blanket—54x76—good and warm. Come in gray only.

Gray Cotton Blankets
at \$3.50 Pr.

Another lightweight blanket—64x80—but a better made blanket.

Gray Cotton Blankets
at \$3.75 Pr.

Full bed size—64x76—a heavier blanket and nearly as warm as wool.

Nashua Woolnap
Blankets at \$7.50 Pr.

Here's a warm wooly blanket. Full 64x70—hard to tell it from wool. White bound in pink.

Nashua Woolnap
Blankets at \$8 Pr.

We doubt very much if you'll find their equal anywhere at the price. Warm and friendly—66x80—and come in gray, white and plaid.

Mashua Woolnap
Blankets at \$9 Pr.

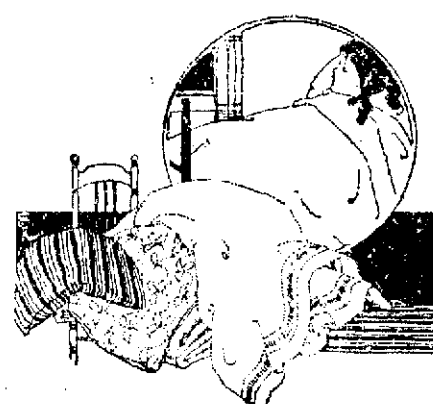

Those big Scotch plaids—66x80—and a blanket that will keep you warm o' nights.

Genuine Wool Blankets
at 10 and \$12 Pr.

These are a blanket that are good to slip under on real cold nights. Full bed size and worth more than we ask.

Maish Comforters at
5 to \$11.

We have a great showing of these Maish comforters. There is a goodly variety from which to choose and the prices are very moderate. All are full double bed size.

ROSS & WOODS

PRaises HARDING'S WELFARE PROGRAM

"Senator Harding's address on social justice in which he proposed a Federal Department of Public Welfare, is the longest and most practical proposal yet taken by any man of official responsibility," declares Hon. Shuman D. Fess, representative in Congress from Ohio.

"His program goes directly to the core of the problem and demands protection, first, of motherhood, by safeguarding maternity, then of childhood, by proper legislation, and through these, the national health against invasion of disease through low standards of morals and commercial aggression of industry, which exposes to epidemics," he said. "He recognizes social justice not as a woman's problem, but as a general problem, in which women play a larger part. Hence, his specific demands that women be placed on various boards, Federal and State, which have to deal with problems of employment, labor adjustment and wherever national health is to be determined. This concern must extend to women in agriculture, as well as industries."

"Senator Harding's sound common sense prevents his dealing in general theories at the expense of practical results. Alleviate the dangers of bureaucracy, against which he warns, he asks for a reorganization of our departments at Washington which will be one of his earliest tasks, and recommends the creation of a department of Public Welfare, to have directions of the problem of social justice. This will prevent duplication of agencies by unifying a half dozen bureaus now doing a haphazard work into one responsible and responsive department of the government. This step carries a program of social justice from the stage of theoretical speculation to that of practical execution, and the country can expect immediate action along practical lines."

Mr. and Mrs. Will Gearhart of Du Bois spent the day with relatives here.

Pictureque Custom.

A unique and picturesque custom in Korea is the binding down of a family heirloom from father to eldest son. This heirloom, made from the hair of family ancestors, is a priceless possession, and is so carefully handled that it does not wear out for generations.

Art of Staining Glass.

Fifty years ago the old secret of staining glass, which was lost with the decline of art in the seventeenth and eighteenth centuries, was rediscovered and, with the aid of chemistry, has made remarkable progress. This is shown by the fact that today the glass-stainer disposes of more than 5,000 different pigments, while in the twelfth century, the golden age of glass staining, only 12 colors were known.

ARE YOU GIVING YOUR CHILD A FAIR CHANCE?

Since the schools throughout the country are again open, every mother should consider whether or not her child, working under a handicap, the study and concentration demanded by school duties is work for a little folks, and unless their physical condition is in tip-top shape they will soon fall behind their classmates. Statistic have shown that a large percentage of the children in the schools of the country are suffering from malnutrition, a general debility, and chronic ailments in this condition lag behind in their studies, and the ease with which they are handicapped. They work under a handicap, so the question is, how can you give your child a fair chance? Have you taken any precaution to assure the youngster having a full supply of vitality as an aid to school work? Look at your child tonight after school. Does he look fatigued and worn, and come home tired out, or does he come in with sparkling eyes and full of pep and vigor? A wise custom in fitful years ago by your forefathers, was the taking of a good tonic in the fall to drive out impurities, strengthen the system, and fortify against winter's ill and you should follow that custom. Give the kiddie a tonic row, and let Nerv-Worth be that tonic, for the children like it, pleasant to take, and its effects are quickly noticeable. It whets their little appetites, and tones their whole system throughout, and its pleasant taste makes them ask for more. Many grateful mothers have written endorsing its preparation, an example of which is found in the following letter of Mrs. Rebecca Allender. She said: "I am very grateful for Nerv-Worth, for it has helped my little boy. He didn't have any appetite at all, but now he can eat anything he wants to. Do not be late to try Nerv-Worth, for it will tone up the little one in a hurry, and as a tonic for yourself and for the rest of the family, Nerv-Worth is unequalled. Get a bottle today from your druggist. Be sure to get the genuine in the round bottle price \$1.25, plus tax. Call at Stewart's drug store for a free sample."

JUNIOR RED CROSS WORKING AT HOME

Production of Sound American Citizenship the First Aim, Says Dr. Farrand.

On the badge of every member of the Junior Red Cross are the words "I Serve." That tells the story of the school children's branch of the American Red Cross and its efforts to bring happiness to children throughout the world.

Realizing that the time never was so propitious as right now for teaching the highest ideals of citizenship, the entire present program of the Junior Red Cross has been framed under the very inclusive phrase, "Training for Citizenship Through Service" for others. Since the Junior Red Cross is the agency through which the American Red Cross reaches the schoolboys and the schoolgirls, all its activities are designed to come within the regular school program, and without creating new courses or increasing the number of studies to lend its aid in vitalizing the work of the schools.

"The thing that is needed," says Dr. Livingston Farrand, Chairman of the American Red Cross Central Committee, "is not a perpetuation of the Junior Red Cross, but the training and breeding of sound American citizenship inspired by the true, fundamental ideals of sound democracy. One of the great conceptions in making the Red Cross a contributor to better citizenship in our American democracy is the realization that after all the sole hope of any nation is with the children of the country."

The plan of organization of the Junior Red Cross makes the school—public, parochial and private—the unit, not the individual pupils. Mutual service, helpful community work such as clean-up campaigns, care of the sick, promotion of health regulations, participation in civic and patriotic movements—all these creative agencies designed to translate into life and action the regular school program are parts of the machinery which the Junior Red Cross places at the disposal of the school authorities.

Graded study courses giving practical methods of civic training, supplemented by pamphlets and helpful suggestions, are supplied to the local schools by the Junior Red Cross. An elaborate plan for promoting an interchange of correspondence between children in different sections of the United States as well as with children in foreign lands is being devised and will take a prominent place in the established classroom program.

In promoting the general cause of child welfare, Red Cross courses in home hygiene and care of the sick, first aid, and dieting may be established in all Junior Red Cross Auxiliaries.

The ideals and the objective of the Junior Red Cross are embodied in the pledge of service which the pupil takes when he signs the membership roll and pins on his coat the Junior's badge. The pledge which binds together service and citizenship reads:

"We will seek in all ways to live up to the ideals of the Junior Red Cross and devote ourselves to its service."

"We will strive never to bring discredit to this, our country, by any unworthy act."

"We will reverence and obey our country's laws and do our best to inspire a like reverence and obedience in those about us."

"We will endeavor in all these ways, as good citizens, to transmit America greater, better and more beautiful than she was transmitted to us."

At the foundation of this school program of the Junior Red Cross is a great love for America's children.

RED CROSS ACTIVE IN DISASTER RELIEF

When disaster hits a community—fire, flood, earthquake, explosion, bad wreck or tornado—the American Red Cross can be depended upon to follow right at its heels with help for the stricken people. Red Cross relief is almost immediately forthcoming—food, clothing, shelter and funds; doctors, nurses and special workers with long experience in handling similar trouble elsewhere.

During the last year, ending June 30, there was an average of four disasters a month in the United States. One hundred and fifty communities in twenty-seven states suffered. The largest and most destructive of these were the tidal wave at Corpus Christi, Texas, and tornadoes in Mississippi, Louisiana, Alabama, Georgia, Ohio, Indiana and Illinois.

In these events of horror 820 persons were killed, 1,500 were injured, 13,000 were made homeless, about 30,000 families needed help, the property loss was nearly \$100,000,000 and almost \$1,000,000 in relief funds, not including emergency supplies was expended.

To the sufferers from all disasters during the year, the American Red Cross sent \$120,000 worth of supplies, 110 Red Cross nurses and seven special relief trains. To meet the needs of the stricken, the organization set up ten relief stations, operated thirty food centers and as many emergency hospitals. One hundred and twenty-five Red Cross chapters gave disaster relief service.

If disaster ever strikes this town or county, the citizens can be absolutely sure the Red Cross will be right on hand to help them in every way.

Jack O'Brien and Russell Thorton spent yesterday in Punxsutawney. Mrs. Bert Yohne of Paton spent yesterday shopping in town. Claire Robbins of Tyone spent the day with friends here.

BET PULLER IS LATE INVENTION

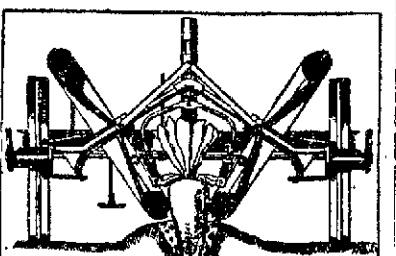

Machine Designed by Californian for Doing This Hard and Expensive Task.

INJURY AVOIDED BY WHEELS

As Beet Is Pulled From Ground Knives on Each Side Cut Off Tops of Leaves—Easy to Harvest Profitable Crop.

Pulling sugar beets is one of the big jobs which confront the grower of this very profitable crop. It is a lot of work, and work that takes time and energy at least, and often costs money as well. A man in the beet fields of California has designed a machine which he thinks is a wonder for doing this hard and expensive task. Instead of using inclined rods, on the principle of the gathering points of a corn binder, for pulling the beets, this man uses padded wheels for this purpose.

Cross Sectional View.
The upright V-shaped portion of the accompanying illustration is a cross sectional view through the padded wheel pullers. The axes of these wheeled pullers extend down to the inner hubs of the main driving wheels of the machine, and are here driven or revolved by these main wheels. Grouters or diggers go along ahead of the pulling wheels, on each side of the row of beets, and loosen the ground around them so that they will be easier to pull when the pulling wheels of the machine engage them. From the drawing it will be noticed that the pulling wheels are set so the lower portions are much closer together than are the upper portions. As the machine passes forward over the beets in a row, these pulling

Beet Topper and Puller.

wheels are rotated backward and upward, and in so rotating they lift beets out of the ground.

Cuts Off Leaves.

So located between the pulling wheels that they pass just over the top of the beet are two knives, one on each side. Thus, as the machine is drawn forward and the beet is lifted up, these knives cut off the top or leaves of the beet; thus it is pulled and topped at one and the same time by the one machine, these being two separate operations in the ordinary hand method of harvesting beets.

FIGURING CAPACITY OF SILO

In Estimating Diameter and Height Allow Each Cow Four to Five Square Feet of Surface.

If your cows are fed 40 pounds silage daily for six months they will need nearly 7,500 pounds or a silo capacity of four tons each. In estimating diameter and height, allow each cow four to five square feet of feeding surface in the silo. Ten cows would require a feeding surface of 50 feet. A silo eight feet in diameter would have a cross section or feeding surface of 50 square feet. For ten cows therefore, a silo should be eight feet in diameter. Fifteen cows should have a silo 10 feet in diameter (if 20 feet high it has a capacity of 26 tons and if 32 feet high, 51 tons); 20 cows should have a silo 12 feet in diameter. Forty cows will need a silo 16 or 18 feet in diameter and about 80 feet high.

TREATMENT OF ARMY WORMS

Pests Can Be Kept Out of Field by Plowing Up a Furrow in Front of Them.

After army worms once get into a field there is nothing practical which can be done to stop them. They can be kept out of a field, however, by plowing a deep furrow in front of them. Plow a furrow about eight inches deep and square up one side of the furrow with a spade. Every ten or fifteen feet in the furrow dig a shallow posthole. As fast as the army worms accumulate in the furrow, and especially in the postholes, sprinkle them with kerosene. Army worms move fast and it is necessary to apply this treatment promptly or they will have moved into the threatened field and there is nothing whatever which can be done. If the trench treatment is applied promptly it proves very satisfactory.

GRAIN FOR EWES AND LAMBS

Unless Animals Are Being Conditioned for Market Pasture and Forage Are Sufficient.

If the ewes and lambs have good pasture and forage crops it will seldom pay to feed any grain feed, unless the lambs are being conditioned for the summer market. Pumpkins planted in the corn field make an ideal supplement for the fall pastures.

Mr. and Mrs. John M. Bannett today for Atlanta where they will spend several days with relatives.

REAL ROOSEVELT ABHORRED WILSON AND HIS WORKS

Yet Democratic Candidate for Vice Presidency Slanders Great Leader's Memory.

MAKING FUTILE ATTEMPT TO WIN ON OLD ISSUES

Fifth Cousin Removed Roosevelt No Able to Convince Followers of T. R. by Specious Arguments.

By SCOTT C. BONE.

Touring the country as a candidate for Vice President, Franklin D. Roosevelt is vainly endeavoring to invoke the progressive spirit of 1912 in support of Wilsonism and the election of the Democratic ticket in November.

What would the real Roosevelt—Theodore Roosevelt—the Immortal T. R.—say to his followers were he alive today?

Gone, he left burning words which tell all too plainly what his attitude would be at this time.

He abhorred Wilsonism, just as he abhorred Danielism, with both of which Franklin D. Roosevelt has been identified as an Under Secretary.

Condemned Wilsonism.
Theodore Roosevelt condemned Wilsonism and the whole Wilson administration in unsparring terms.

Read anew what he said at Cooper Union on November 3, 1918:

"I have been amazed because I have criticised Mr. Wilson. I have not said one thing of him that was not absolutely accurate and truthful."

"I have not said one thing of him which I did not deem it necessary to say because of the vital interests of this republic."

"I have criticised him because I believe he has dragged in the dust what was most sacred in our past and has jeopardized the most vital hopes of our future."

"I criticise him now because he has adroitly and cleverly and with sinister ability appealed to all that is weakest and most unworthy in the American character; and also because he has adroitly and cleverly and with sinister ability sought to mislead many men and women who are neither weak nor unworthy, but who have been misled by a shadow dance of words."

"He has made our statesmanship a thing of empty eloquence."

"He has covered his fear of standing for the right behind a veil of rhetorical phrases."

"He has wrapped the true heart of the nation in a spangled shroud or rhetoric."

"He has kept the eyes of the people dazzled so that they know not what is real and what is false. So that they turn, bewildered, unable to discern the difference between the glitter that veneers evil and the stark realities of courage and honesty, of truth and strength."

"In the face of the world he has covered this nation's face with shame as with a garment."

So much for Theodore Roosevelt's opinion of Wilson and Wilsonism in support of which Franklin D. Roosevelt, life-long Democrat, would now invoke the progressive spirit of 1912!

Abhorred Danielism.

And what did Theodore Roosevelt think of Daniel's administration of the Navy Department of which the Democrat, Franklin D. Roosevelt, has been a more or less conspicuous factor and part?

In a speech on "Americanism and National Defense" at Chicago, October 26, 1916, Theodore Roosevelt said: "More harm has been done to the navy or the politicians in power during the last three years than in the preceding thirty. Whatever good has been accomplished in the navy during the last three years has been done by naval officers, who, in most cases, have been snubbed and punished for their proposals as long as it was safe to do so; whereas Mr. Daniels now turns and claims credit for what was thus forced upon him."

"In short, throughout President Wilson's term there has been neglect or positive maladministration in connection with departmental organization in navy yards, aeronautics, mines and torpedoes, and in all other matters affecting the efficiency of the fleet and the enthusiasm of its officers and men."

The activity and energy of the Navy Department under President Wilson has been primarily concentrated upon schemes aimed at vote-getting or advertising."

This, then, is what Theodore Roosevelt thought of the administration of the Department from which Franklin D. Roosevelt, Democrat, and exponent of Wilsonism, now would reach the Vice Presidency and have progressive of 1912, followers of the real Roosevelt, help to keep the Democratic party in power and make Wilsonism secure!

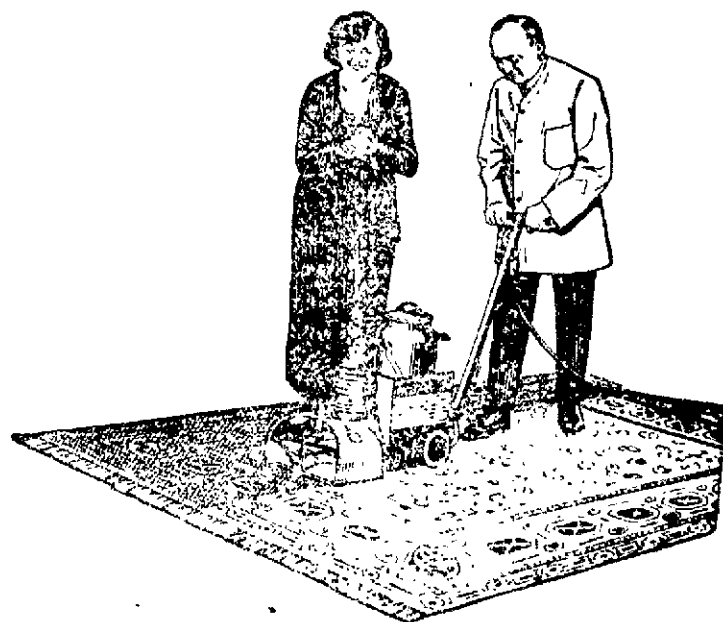

It is memorable that any true follower of Theodore Roosevelt will not be misled by a preposterous appeal.

Mrs. Nathan Owen of DuBois today for Altoona where they will spend several days with relatives.

Good News for the modern housewife

Carpets washed and dried right on the floor by the

Hamilton Beach Carpet Washer

Here is wonderful news for the pick-and-pan housewife who has long felt the distress of dirty rugs and carpets. Floor coverings can now be thoroughly, completely cleaned. They can be washed clean—not a new idea, but with the Hamilton Beach Carpet Washer, a newer, better method.

Below is a picture of a rug being washed. And it is a wonderful thing to watch. The residue of mud, grease, and street-trackings which the vacuum cleaner leaves is being washed out. Disfiguring food stains and street blotches are being washed out. Brilliant colors, yellows and reds and blues, seem literally to pop up behind the Washer as it moves forward. All the dirt that covers colors is removed. Every speck of dirt is scrubbed out and whisked away.

Goodness, know what you will

think when you see it; it is a wonderful thing to watch old, faded floor coverings revived to like newness and freshness. And it is a revelation to feel how soft and downy their texture is, after the Carpet Washer washes out all harsh dirt and mud-glaze.

And it is all done right on the floor, so that you are not depressed by bare, unlighty room while your rugs are in the cleaner! This is how the Hamilton Beach Carpet Washer works! With an action just like a human hand, two sponge rubber brushes, rotated electrically 500 times a minute, scrub the 11-12 compound deep down into the fibers of the rug. The mud and dirt and grease are instantly dissolved, and returned back into the revolving pan. Area in less than an hour the immaculate rugs are ready for immediate service.

THE WILSON-COX ACCORD

By Nick West

He used to be
Too proud to fight.
Nobody dare
Deny it.

And when it came
To making peace
He proved too proud
To try it.

Instead of Peace
He sought a League—
A statesmanlike
Abortion;

And now we've neith-
Er Peace nor League;
A Piece of League
Our portion.

THE COLLAR CAME ALSO

By Nick West

There once was a person named Cox,
Who wanted to wear Wilson's socks,
But his friends made a holler
When they found Wilson's collar
Was wrapped in the very same box.

STRIPED BEETLE QUITE HARMFUL

Insect Transmits Bacterial Wilt
to Cucumbers, Squashes and
Other Plants.

SPRAYING IS RECOMMENDED

Insects Prefer Unsprayed Plants as
Food and Efficiency of Control
Would Be Enhanced by Use of
Early Trap Crop.

(Prepared by the United States Depart-
ment of Agriculture.)

Infection with the bacterial wilt of
cucurbits does not occur through soil
or seed. The striped cucumber beetle
and the 12-spotted cucumber beetle are
both summer carriers, and probably the
only means of summer transmis-
sion of the disease in the localities
that have been studied. Introduction
of virulent bacteria into the interior
plant tissues is necessary for infection.

These points are given in a recent
United States department of agricul-
ture publication detailing the results of
studies on the disease, which occurs
in 31 states, including the territory
from Vermont and Canada to Florida
and west to Minnesota, Nebraska, Co-
lorado and Texas. The disease also
probably occurs in parts of California.
Of the common domestic cucurbits the
disease affects cucumbers, cantaloupes,
summer and winter squashes and
pumpkins, but not watermelons.

Use Bordeaux Mixture.

Spraying with strong bordeaux mix-
ture and lead arsenate paste (4-5-50
plus 2) is recommended where the dis-
ease is likely to be severe. Treatments
should begin as soon as the cucumber
plants develop their first true leaves
and should continue at intervals of
about a week until the cucumber beet-
les practically disappear from the
field. In localities where downy mild-
ew is also prevalent the treatments
should be continued later as a partial
insurance against this disease. The
beetles prefer unsprayed plants as
food, and undoubtedly the efficiency of
wilt control would be enhanced if a
slightly earlier trap crop, such as
squash, were planted along the edges
of the cucumber field. The beetles
could be easily poisoned there with a
strong insecticide.

Pulling of wilted vines during the
first part of the season, or as long as
it can be done without mechanically
injuring the healthy plants, will greatly
assist in controlling bacterial wilt
if consistently done in all neighboring
fields. The diseased vines should be
buried, or otherwise removed from ac-
cess by the beetles.

Where a few plants only are grown
in garden plots, screening the hills
with fine mosquito netting will prevent
the appearance of the disease.

Control in Greenhouses.

For control in greenhouses the beet-
les, in the first place, should be kept
out. Do not grow cucurbits nor pile
cucumber refuse in the immediate vicin-
ity of greenhouses, as this attracts the
beetles and many will later find their
way into the houses. If the beetles
once gain entrance to a house filled

Large Cucumber Field.

with growing plants hand picking is
the only remedy to be recommended
until some fumigant is found that will
kill the beetles without injuring the
cucumber plants. Besides destroying
the cucumber beetles, great care must
be exercised in disinfecting all instru-
ments used in pruning wilted vines be-
fore using them again on healthy
plants. This may easily be done with
a bottle of 1 to 1,000 mercuric chlorid
and a sponge.

MULCH IS NOT APPRECIATED

Practice Has Long Been Recognized
as Important Factor in Success-
ful Fruit Culture.

Although mulching has long been
recognized as an important factor in
successful small fruit culture, the
value of summer mulching in the veg-
etable garden is not yet appreciated
by most home-acre gardeners, and it
is not practiced by them as generally
as it deserves to be.

INJURIOUS TO CROWD SWINE

Far Better Plan to Order Additional
Car Than to Pack Too Many
in One Compartment.

Losses of hogs in the past have
proven that it does not pay to try to
crowd a few extra in the car. It
would be far more economical to or-
der an additional car, the freight rate
being no larger than the loss that may
be entailed by the overloading.

Mrs. Fred Leary and little son left
last evening for Greensville where
they will visit relatives.

The KITCHEN CABINET

Perhaps you met griefs in the pasta
and can't help it.
It will never bring solace to cher-
ish them still.
There are rainbow-lined clouds, there
are paeons of gladness
Awaiting your bidding to come at
your will.

SEASONABLE DISHES.

For any meal after breakfast a salad
will be enjoyed. A simple head lettuce
with a French dressing,
which is well seasoned,
adding a spoonful of cat-
sup, Worcester's shir-
az sauce and a little onion
juice or grated onion, is
a salad hard to equal.
For variety, roll a half
cupful of fresh, crisp
peanuts, sprinkle with a
finely minced onion over head lettuce
and serve with French dressing.

Waffles.—Two cupfuls of sifted
flour, two egg yolks, two cupfuls of
sour milk, three teaspoonfuls of bak-
ing powder, one-half teaspoonful of
soda, one teaspoonful of salt, and two
teaspoonfuls of melted shortening.
Dissolve the soda in the milk, add the
salt and baking powder to the flour,
add the beaten yolks and shortening;
give a good beating after all the in-
gredients are mixed. Bake on a hot
waffle iron.

Fruit Salpicon.—Peel three bananas,
remove the coarse threads and slice
in thin slices; peel two oranges and
cut in lengthwise slices; remove the
exterior of a pineapple and shred with
a fork to remove the fruit from the
core; skin the grapes, one-half pound
of white ones, and remove the seeds.
Mix the fruit lightly with one cupful
of sugar, the juice of a lemon.
Chill and serve in sherbet cups gar-
nished with maraschino cherries.

Chicken a la McDonald.—Make a
sauce of three tablespoonfuls each of
flour and butter and when well mixed
add one and one-half cupfuls of scald-
ed milk. Cook until smooth, then add
one cupful of cold cooked chicken cut
in strips, three cold cooked potatoes
cut in one-third-inch slices and one
truffle cut in strips. Season with salt
and pepper and serve hot.

Chicken Cooked in Milk.—Cut up a
good fowl as for fricassee, place in a
deep baking dish, season and roll each
piece in flour before placing in the
dish. Cover with sweet milk and bake
in a moderate oven until the chicken
is tender and the sauce cooked down to
a well thickened gravy.

If Back Hurts Begin On Salts

Flush the Kidneys at once when
Backache or Bladder bothers—
Meat forms uric acid

No man or woman who eats meat
regularly can make a mistake by
flushing the kidneys occasionally, says
a well known authority. Meat forms
uric acid which clogs the kidney pores
so they sluggishly filter or strain only
part of the waste and poisons from
the blood, then you get sick. Nearly
all rheumatism, headaches, liver
trouble, nervousness, constipation,
dizziness, sleeplessness, bladder disor-
ders come from sluggish kidneys.

The moment you feel a dull ache
in the kidneys or your back hurts, or
if the urine is cloudy, offensive, full
of sediment, irregular of passage or
attended by a sensation of scalding,
get about four ounces of Jad Salts
from any reliable pharmacy and take
a tablespoonful in a glass of water
before breakfast for a few days and
your kidneys will then act fine. This
famous salt is made from the acid
of grapes and lemon juice, combined
with lithia and has been used for gen-
erations to flush clogged kidneys and
stimulate them to activity also to
neutralize the acids in urine so it no
longer causes irritation, thus ending
bladder disorders.

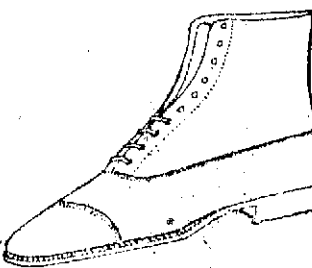

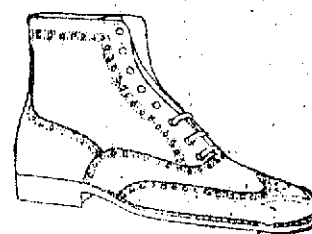

Jad Salts is inexpensive and can-
not injure; makes a delightful effe-
rescent lithia-water drink which all
regular meat eaters should take now
and then to keep the kidneys clean
and the blood pure, thereby avoiding
serious kidney complications

Gossip for Tonight's Tea Table

Miss Anna B. Savage of 303 Pine street has returned to her home after a week's visit with her cousin, Mrs. Ella Dietrich at Hastings.

Harry Bigler Hepburn of Grampian was calling on old friends in town Monday.

Paul Stock of South Second St., has purchased the little old Ford that put Andy McBlain on the blink.

Mrs. Fred B. Leavy and Fred B. Jr., are visiting friends in Greenville and Erie at present.

Mrs. A. B. Leavy and daughter Lil han have returned from Poughkeepsie where they have been for the past week.

A quartet composed of Misses Margaret Bell, Rebecca Smith, Lucille McGee and Mrs. A. P. Kreier motored to Glen Richey last evening, where they sang at a meeting for the benefit of the hospital.

Test in Acoustics.

To test the acoustic properties of a hall, the lecturer proposed counting the number of seconds the clapping of the hands could be heard; if five or six seconds, the hall is unfit for public speaking, for which it must be reduced to two or three seconds, but for musical purposes a little longer may be allowed. Draping the hall is the best way to reduce the reverberation, belief in the efficacy of stretched wires being a mere relic of superstition.

Partial to Gloves.

When Elizabeth was queen of England she was very partial to fine gloves as presents, giving them to her friends and enjoying it very much when they were given to her.

Registering Thermometer.

For industries where temperature records are of value an inventor has devised a registering thermometer that can be connected to and operated by an alarm clock.

Losing Experiment.

"Had you a hard time at the hospital?" "Had I? I lost weight, they gave me a weigh the first thing, and they even took my temperature."

LAUDS HARDING'S WELFARE PROGRAM

Marion, O.—Mrs. Raymond Robins, of Chicago, was the spokeswoman for thousands of women industrial workers and women interested in problems of public welfare who gathered here to listen to Senator Harding's speech on "Social Justice."

Mrs. Robins, who is president of the National Women's Trades Union League, said:

"We have come knowing well that we represent but one of many groups

MRS. RAYMOND ROBINS.

of citizens in America, with necessarily divergent interests, and we understand we must find the way so to relate our various needs and hopes and aspirations that out of such inter-relationship may come the realization of America's ideals, for first and above all we want to serve our country."

"We have always known," said Mrs. Robins, "that certain groups of women are vitally interested in social and industrial questions—but we did not know that the great mass of women, all sorts of women, young and old, from the farms and from the cities—are also interested."

"What is it they see in the call to social justice? They see their opportunity to serve the nation in and through a program dealing with the vital issues with which they are at home, the protection of childhood, the care of mothers and babies, the safeguarding of women workers, the conservation of health and the needs of women on the farms."

"We have listened to a great speech, one of the few great speeches of a decade, and its effect will be far reaching."

Many are for Cox, says George Harvey, because they are convinced that he will not keep his word. It is hard to conceive a harsher criticism of a Presidential candidate—Wheeling (W. Va.) Intelligence.

TRANSPORTATION IS BOTHERING FARMERS

Particularly True in Case of Perishable Produce.

Adequate Facilities Would Enable Producer to Pick His Market and Sell When and Where It Is Most Advantageous.

Regardless of the shortage of labor and other production problems confronting the farmer, the main cause for his not securing the full profits due him can still be traced to insufficient transportation facilities, at the time he must get his crops to market. The farmer who can convert the spoilage on the farm into cash goes a long way toward satisfactorily offsetting everything else eating into his returns.

This is particularly true in the case of highly perishable produce, also that which has a high market value early in the season. Another advantage of adequate farm transportation is that

Gathering Potatoes in Field and Loading on Truck.

It enables the farmer to pick his market. He can sell when and where it will be to his greatest advantage to do so.

The farmers in the potato growing section of Maine have a period of about seventy days to market their crop. The case of one man in Aroostook county and what he did to put his yearly returns in the plus column is not only interesting but typical of how these men solved their haulage difficulties.

This particular grower had a 160-acre potato farm situated seven and one-half miles from a railroad. It yielded about 150 barrels to the acre for a total crop of around 24,000 barrels a year. Road conditions were such that one team of horses could haul but 20 barrels to a load and make but one trip a day to the railroad storage house. In other words, he required 20 teams to haul his crop if he got it to the warehouse in the 70 days between "digging" and snow. Of course all the other farmers of the community were in the same position and naturally none of them could secure anything like 20 teams. Even if they had the loads could not have been handled at the loading platform. Incidentally the haulage cost of the 20 teams would have been \$30,000.

The farmer in question put the problem up to a truck concern. They prescribed a truck for his job. He bought it. This handled 15 barrels of potatoes to the load, made six trips a day and more at night put the potatoes in the storehouse in 70 days and more than paid for itself while it was doing it as the regular haulage rate by teams was 25 cents a barrel.

The motortruck is not a cure-all for every transportation ill, but it has barely scratched the surface as a farm transportation unit. There are innumerable cases of where it can go a remarkably long way to give the farmer more of the profits due him. This story illustrates but one of them.

TO DESTROY JOHNSON GRASS

Crop of Oats or Wheat Will Keep Plants in Weak Condition and Prevent Root Penetration.

If during the early and mid part of summer the Johnson grass can be kept short enough to keep the plants in a weak condition, comparatively few root-stalks that penetrate deep into the ground will be formed. An oat or a wheat crop serves this purpose quite well. When the Johnson grass is in this weakened condition, plowing in August will further weaken the plants and will entirely kill many of them. If the ground then is given clean cultivation until fall, nearly all of the grass that is not killed by the cultivation will freeze out during the winter. In case a good deal of the grass shows up after this midsummer plowing it may be advisable to plow in late fall so as to further expose the roots to freezing.

SOY BEAN GOOD SUBSTITUTE

When Cured in Time Crop Makes Hay That Is Quite Palatable—Yield Is Satisfactory.

It will take two or three years to get back to the normal amount of hay land, and in the meantime the soy bean is one of the best substitutes for the regular perennial legume hay. If cured in time, it makes a hay that is very palatable and at the same time gives a satisfactory return per acre. Probably two and a half tons of cured hay would be about the average yield.

Mr. and Mrs. Abe Meikin left this morning for Philadelphia.

Mrs. Agnes Robinson of West Da- cantin was shopping in town yesterday.

KNOW

THE CLEARFIELD PROGRESS

THE WEATHER

Partly cloudy tonight and Wednesday. Little change in temperature.

VOLUME XV

THE CLEARFIELD PROGRESS, CLEARFIELD, PA., TUESDAY EVENING OCTOBER 19, 1920

NUMBER 66

ENFORCEMENT OFFICER AT PITTSBURG FIRED: FALLING DOWN ON THE JOB

PITTSBURGH, October 19.—J. W. Connors, prohibition agent in charge of this district was removed from office today on order brought here by Leo A. Crossen, supervising director of the dry enforcement law in New York, New Jersey, Pennsylvania and Delaware. Removal of Connors followed protest from John Kramer, Prohibition Commissioner, that illicit sale of liquor was not being curbed.

CHICAGO BANDIT GETS \$20,000 IN HOLD UP OF LONE BANK MESSENGER

CHICAGO, October 19.—Three bandits obtained \$20,000 in cash and \$50,000 in negotiable bonds here when they held up Carl Maurer, a bank messenger today. Maurer had just left a suburban institution with the money for a downtown bank when held up. A policeman usually accompanied the messenger but the police was late and Maurer decided to go alone. No trace of the robbers could be found and Maurer was unable to give a good description of them.

WILL GO BACK FIVE YEARS IN PROBE OF CROOKEDNESS IN BASEBALL

CHICAGO, October 19.—Investigation of base ball as far back as 1917 will be taken up by the Cook county grand jury here today. John A. Heydler, president of the National League, was to appear and bring with him records of base ball played by the National League. Heydler said he would present evidence of games played in 1917 in which Hal Chase, New York's first baseman, played and who was found guilty of gambling.

HARDING WILL WAGE STRENUOUS CAMPAIGN IN HOME STATE OF OHIO

MARION, Ohio, October 19.—The last week of Senator Harding's campaign will be spent in a tour of Ohio, it was announced today. He will make set speeches in Cincinnati, Cleveland, Columbus, Canton and other cities and make rear platform speeches in a number of small towns. Harding will then rest for a few days before going on his eastern trip to Buffalo and Rochester.

BOLD HOLD UP NEAR BEAVER FALLS

BEAVER FALLS, Pa., October 19.—Held up by men believed to be in search of liquor Joe Goldberg aged 35, of Cleveland, Ohio, is reported dying in a local hospital and Can Arovitch, of Cleveland, his companion is being detained by police here. According to the story the men who were driving from Pittsburgh were held up by men in another automobile. Goldberg was robbed of \$1,000.

WE'RE GOING TO GET A NEW SUIT

CHICAGO, October 19.—Retail clothiers throughout the country are determined to sell at cost according to Andreas Burkhardt, President of the National Association of Retail Clothiers. "Outrageous prices in the past few years have brought consumers to a state where they will not use reason and so clothing dealers are determined to sell without their usual profits," Burkhardt said.

CONFISCATE \$25,000 TRUCK LOAD OF WHISKEY

PITTSBURGH, Pa., October 19.—Twenty-five barrels of whiskey valued at \$25,000 was confiscated by federal authorities when they seized two trucks here last night. Four men on the trucks were released on \$1,500 bail but failed to appear for a hearing today.

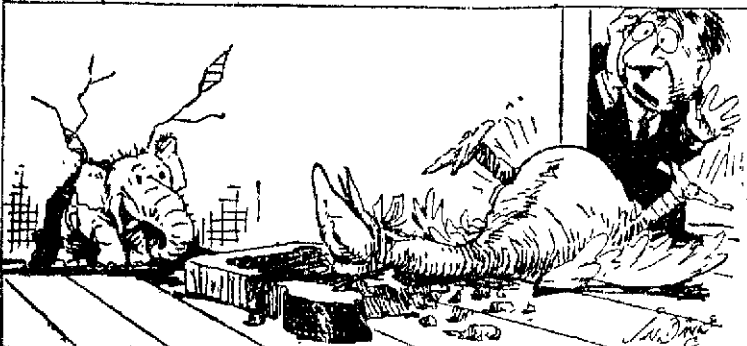

DOCTORS "INSULTED" WOMAN

A physician was called to a farm near Frankfort Heights today and when he arrived found quite a crowd of the neighboring women present offering condolence, a dance, etc. The woman running up to the doctor as he was leaving his car, said: "She was taken suddenly sick with a pain in her side and four other women came to the house and insulted her and I am sure but I was very close. They decided she had eaten something of something that had a paragraph in it, and so they gave her a hypodermic injection of a drug that would destroy the bacteria but she didn't seem to be helped and was soon in a state of collapse."

REV DIXON HAS PROSPEROUS YEAR.

Rev. J. W. Dixon of the Allen M. E. church closed the first year of his pastorate in Clearfield and left today for conference at Pittsburgh. Rev. Dixon has made a distinct success of the work of his church during the year. The membership has doubled, while the total revenues raised for the support of the church amounted to more than \$2,500, which was also more than double the previous year's revenues. Rev. Dixon plans to dispose of the present Third Ward property and remove the church to another section of the town at the conference returns here to Clearfield. He has made many friends during his residence here and will be welcomed back.

Exterminating the Varmints

Reproduced by permission New York Tribune, Inc., Copyrighted 1920

CANNOT CHANGE DETOUR TO DUBOIS, SAYS SOLICITOR

When state road building begins in this section next spring the official detour between Clearfield and DuBois will likely be over the mountain via the old Penfield pike. For some time interested persons have been behind a movement to have the county commissioners take over a road or route leading from the Home Camp and Winterburn pike at a point northeast of the Elias Linniger farm and extending some three miles east to a point on the Penfield pike at the farm of Frank Johnson.

This proposed road would shorten the distance between Clearfield and DuBois considerably it is claimed. The matter of the proposed change was put up to the commissioners by petition, which petitions were referred to the county solicitor, who advises the commissioners that they have no right under the law to make such change. Solicitor Woodward's opinion in the matter follows:

To the Commissioners Clearfield, Pa. Gentlemen: I have received from you petition of various citizens of Huston township and elsewhere praying the county commissioners to take charge of a certain road leaving the Home Camp and Winterburn Pike at the point northeast of the Elias Linniger farm and extending a distance of three miles in an easterly direction to a point on the Penfield and Clearfield Pike at the farm of Frank Johnson; said road being situated in Pine township.

It is alleged in said petition that the proposed route is a much shorter route between DuBois and Clearfield than the one now in use and a much more convenient one for the traveling public now and as long as the State Highway between DuBois and Clearfield shall be closed in whole or in part for reconstruction; also praying that the road from DuBois to Home Camp thence to the Elias Linniger farm and thence to the Penfield and Clearfield road be made and set aside as a detour from DuBois to Clearfield. In this matter I beg to advise:

1st: That the only construction

now upon the State Road between DuBois and Clearfield that involves detours is first, that part of the road between Clearfield and Curwensville, and second, a part of the road from near Salem, and past Luthersburg. In both of these cases detours were established last spring and are being maintained so that there is now no necessity for any other detours to replace the state road between Clearfield and DuBois.

2nd: That the road proposed as a detour can not be so established in view of the facts stated in the first paragraph, or can not be so established at least at this time. When the state undertakes to reconstruct the road from Luthersburg to Gramplan it may be necessary to establish a detour connecting DuBois to Clearfield. This however, is in the future and it may be a year or more before any action ought to be taken in this respect.

3rd: In establishing detours for state highways the County Commissioners must consider the needs of the general traveling public and not the needs or wishes of any particular locality or individuals. In establishing a detour between DuBois and Clearfield regards must be had for the accommodation of the greatest number of people who constitute the traveling public and who formerly used the route to be replaced. When the time comes in the future to establish a detour between DuBois and Clearfield I am sure that the Commissioners will take the matter up and consider it on broad general lines and in accordance with the welfare and best interests as well of the county as of the traveling public. I would advise the persons active in this project to the effect that no additional detours are needed at the present time on the road from DuBois to Clearfield and that when the time comes that such detour or detours are needed, due consideration will be given to the petition filed with the Commissioners.

I return herewith to you the petition for filing.

Yours very truly,
A. H. WOODWARD

STOCK PRICES

NEW YORK, Oct. 19.—Twelve o'clock prices on the stock exchange today were: American Locomotive, 95; Baldwin Locomotive, 117 1/2; B. & O., 47 1/2; Bethlehem Steel, 70 1/2; Crucible Steel, 129 1/2; Erie, 18 1/2; Erie 1st pref., 28 1/2; Erie 2d pref., 20 1/2; General Motors, 18; General Electric, 141; Mexican Petroleum, 190 1/2; Maytag, 38; Penna., 4 1/2; Republic Iron and Steel, 76 1/2; Sinclair Oil, 10 1/2; United States Steel, 87 1/2; United States Steel, pref., 109; Westinghouse Electric, 46 1/2.

MARRIED AT WEST SIDE PARSONAGE

William G. Rees, a well known Third Ward resident, and Mrs. Celia English, of Sunnyside, Pa., were united in the holy bond of wedlock at the West Side Methodist parsonage yesterday afternoon by Rev. C. C. Smiley. They will reside in Clearfield.

Edna Turner, Jim Polkman and George Dougherty have returned from a tour to P. D. Hopkins.

BOYS SCOUTS WILL HAVE PERMANENT SUPPORT SOON

Through the men of Clearfield who are interested in our boys the Boy Scout movement is to receive a boost. For sometime Scouting has been attempted in this locality with the result that there are four troops now in existence. It has been felt by those at the head of the work that it is necessary, for the betterment of the scouts, and the increase of interest in the movement, to form a council and thus head up the work for the entire community.

A second class council will be formed which assures a local headquarters, a scout commissioner and a summer camp. All business will be done through the local headquarters.

There will be a meeting of all men interested on Friday evening at 8 o'clock at the Y. M. C. A. at which time Arthur A. Schuck, national field executive for the Third district, which includes the State of Pennsylvania, will be present to explain the work and assist in the organization of the council.

All men interested in the welfare of our boys and anxious for their betterment are invited and urged to be present at this meeting.

NOW, WHO THE "DIL" IS MURPHY

Clearfield women are beginning to take real interest in politics. A couple of Second Ward women were swapping gossip one day last week and after having exhausted the community small talk, began a political discussion.

Woman No. 1 opened the debate with "How are you going to vote Mrs. B.?"

Mrs. B. responded with "I am going to vote for Harding; I used to be a Democrat, but am going to vote Republican this time."

Mrs. C. then replied, "Well, I can't see why any person who had been a Democrat could even think of voting for Harding against a man like Governor Cox."

Mrs. B. then said: "Well, look at Murphy."

Mrs. C. Who is Murphy?

Mrs. B. "Well, now, I really don't know, but read in the North American that he was a bad man and he is for Cox. Do you know who he is?"

Mrs. C. "No, I do not, but I am going to find out."

That ended the discussion. The story leaked out when Mrs. C. sought information concerning "Murphy" from a better posted sister politician.

But isn't that so like the dear creatures? Wonder what these women voters really will do. All the politicians are at sea over the answer.

DO NOT FORGET

THE SPEAKING

AT THE

HARDING CLUB

TONIGHT

HE VOLUNTARILY GAVE ALL HE COULD SPARE TO HOSPITAL

Yesterday a man walked into the hospital campaign headquarters in the M. S. building and displayed two checks. One was for \$40 for a doctor's bill. The other was for \$15 for the Clearfield hospital maintenance, endowment and building fund. "The \$40 bill hits me a considerable wallop," he said, "but even at this time I don't want to miss this opportunity to do a little something for the Clearfield hospital which has done so much for me and mine in the past—at a time when its help was needed. So here's my check for \$15, and I'm going to give more as soon as I can spare it."

That is the attitude toward the hospital campaign which is being displayed everywhere in the borough of Clearfield. Nevertheless, the people of Clearfield county are slow in getting "on the job" and in other places are not supported by a sufficient number of co-workers. The careful and systematic preparation and organization achieved by the campaign executive committee and others have resulted in a condition wherein it might be said the people of the county have the money right in their palms, ready and willing to hand it over; but—somebody must go after it and lift it from those palms. So "dig in" all you county teamworkers; turn out in sufficient numbers to visit every little cottage on every byway, and help send the fund to provide your county with adequate hospital service toward the goal.

The largest subscription yesterday came from the Helmbold & Stewart Insurance company of Clearfield, which agreed to contribute \$100 in insurance premiums as needed by the hospital. The Bigler district reported about \$1,000 raised and "going strong;" and other reports are beginning to come in from various points in the county.

"Y" PHYSICAL DIRECTOR ARRIVES

John F. Rau the new physical director for the Y. M. C. A. arrived in town on Friday evening and is getting acquainted with the people and the work. Mr. Rau comes to us from Allentown after two and a half years' experience in the work in the association there.

The work of remodeling the gymnasium will be done between now and the first of November and it is hoped to have the classes begin the first week of next month.

A schedule is being arranged and will be announced in the Progress within a few days.

NEW TERRITORY WILL BE ADDED TO BOROUGH

Ogden Avenue Property Owners Petition Council To Admit Them To City

POLICEMEN ARE ELECTED

A meeting of Town Council, held in the Borough building last evening, was presided over by President Fletcher, was a particularly busy one and much business of interest to the taxpayers generally was disposed of.

Treasurer Wright's report showed healthy balances in the different funds of council while Tax Collector Taylor reported collections of \$2,000 during the month.

The police problem was solved by the election of P. A. Hitt as chief of police and H. S. Brink, patrolman. The women are from Philipsburg. The police has been acting chief the past month and has given general satisfaction. Mr. Brink is the son of Chief of Police Brink of Philipsburg, and comes here highly recommended.

Solicitor Urey reported collections of \$97.56 since last report and presented check for same. He also presented an ordinance fixing the salary of the Chief of Police at \$140 per month and assistant or patrolman at \$125 per month. This ordinance was unanimously adopted.

Several weeks ago a petition was received from a number of property owners in Lawrence township, whose properties adjoined the borough in the Ogden avenue section in which they asked to be annexed to the borough. The matter was presented by Clarence Kramer, Esq., and was referred to the borough solicitor as to the legal procedure in such cases. The solicitor reported that when a section of township territory desired to be annexed to the borough all that was necessary was a petition to council signed by a majority of the property owners in the region affected. When the petition was presented council could, if it was considered desirable, prepare and pass an ordinance pursuant to section 150 of article I, chapter 3, of the general Borough Act of 1915, and the annexation could then be accomplished on the passage of the ordinance.

The ordinance providing for the annexation of the territory mentioned was presented and unanimously adopted and the annexation will be an accomplished fact coincident with the publication of same, the expense incident to the proceeding being borne by the property owners affected.

Notice to build sidewalk in front of his property upon Turnpike avenue, to connect the line of walks to the hospital, was ordered served on Edward Billotte.

The following resolutions recently adopted by the Board of Health, were read to council:

"Resolved, that we, the Board of Health of Clearfield Borough hereby decree, that through street sewer to be a public nuisance and hereby direct council to take immediate steps to abate this nuisance without further delay.

2nd. Resolved, that we, the Board of Health request that Council extend the Bigler avenue sewer from 6th to 4th street in order that we may direct the Elk Tannery Co. to remove their 20 outside closets and install sanitary closets to be turned into Bigler avenue sewer.

We request that council and the Sts., and for which we propose to have sewers to receive the sewerage is now emptying into Orr's Run in the region of Williams and West, and for which, we are reliably informed no sewer exists.

CLEARFIELD BOARD OF HEALTH

The Sewer Committee was directed to look after these propositions; and report at next meeting.

The Street Committee was directed to get after the Pennsylvania Railroad and have them complete their work on Third street, as the present condition of their tracks was a menace to pedestrians having to travel over some of the different crossings.

Dr. and Mrs. Dale and daughter of Philipsburg spent yesterday in town. Mrs. Ernest Caplinger and son Ernest who live in Elkins, West Va., are visiting at the home of William Reece on West Front St. Mr. Reece is a brother of Mrs. Caplinger. Cedric Hill of Jersey Shore has returned to his home after spending several days here.

We have read and been told that the liquor issue is dead that no combative measures are necessary to keep J. B. in his grave. If an body is foolish enough to believe that we invite them to The Progress office where can be seen a copy of the Brewster Hand Book just published. According to this volume of 200 pages 'the fight is on,' 'the wets are active' and 'victory is only a matter of time.'

THEY DO NOT AGREE

It would indeed be a sorry state of affairs if everybody agreed with everybody else. We take a lot of consolation out of those line because there is hardly a day passes that we do not receive a letter or two from readers who do not agree with what is printed in this newspaper. It is a healthy sign when people exercise their minds and take interest enough in public affairs to write their views. However we are unable to publish fully ninety per cent of these letters because they fail to sign their names to the letter. One such was received the other day which is really too interesting to consign to the waste basket with the other unnamed missives. It is interesting in that it shows what the farmer is up against under the general eight hour law and the prevailing rate of wages. It is more interesting in that it is a good reflection of the state of mind of the man who is working against tremendous odds to feed the people of the world. He says:

"I see your article of the 5th, urging farmers to make cider out of their apple. Do you mean to let the corn, potatoes, and other crops rot for lack of help? I know of some men going to cider mills at three or four o'clock in the morning in order to get home in the morning to work on the farm. I know of one who cradled seven acres of buckwheat and then raked it all up, working all day and three quarters of the night.

"I think more of the farmers had better get a car and have a little sporting blood as well as a lot of other fellows who work eight hours and have sixteen to sport around with a white collar, with lots of time to call such as I am 'Old Hayseed' as I was called one day. My idea is that such a fellow ought to go hungry and have to go to the old hayseed for what he wants, pay the price and haul it himself, and be glad he gets what he needs as I am. Since all other workers have eight hour days I think the farmer has no more right to work sixteen hours than anybody else."

It is hardly necessary to add that the cider article was published for the purpose of disposing of the foolish argument of many people that the farmer making cider was liable to prosecution under the Federal Amendment. Whether the farmer is to find time to make cider and vinegar is a matter that he can judge best for himself but frankly we do not see how he is going to do everything that is expected of him.

The next letter is equally as interesting as the question propounded will not likely be solved by any of our people who are ungaily excited over the earnings of the miners. He says:

"Being a coal miner for twenty seven years and a constant Curwensville reader of The Progress for three years I have been impressed by the information concerning the earnings of miners and after reading the account of the West Decatur man earning at the rate of \$6000 a year I am led to propound this mathematical problem. It takes two hundred strokes with a pick and eighty scoops of the shovel to produce a ton of coal. Now, some of you mathematicians lay down your pens and take the pick and shovel and figure out 'how much life is left in your bodies after you earn at the rate of \$6000 a year for about two weeks."

Answers may be forwarded to James A. Millhon, Box 45, Curwensville, Pa.

There's Always Rain In Everybody's Life

and you can never tell when it is coming. The sensible thing to do is not to worry about it but prepare to meet it in times of sunshine. Now when things are going along good, is the time to save a little. It doesn't matter how small the start is, it's the keeping it up that counts. Your account will be welcome here if it starts only with \$1.00.

Have you ever observed that EXTRA VAGANCE has a great deal to do with putting the 'mis' in misfortune?

Feet.
To dream you battle your feet do not trouble in collecting money which is due you. To dream of lost or deformed feet foretells a journey which will cost you many tears. To scratch the bottom of your feet do not treachery and flattery. To have to feel it all is in evil omen. It foretells some great calamity. Cold feet foretells a quarrel with a friend.

Pork in Olden Times
Pork was the chief meat consumed in all countries in Europe down to the middle ages. Immense droves of pigs were kept by Charlemagne in his forest in the ninth century. In his 'History of the Inquisition' published in 1817 Florentino states that in Spain those who did not like pork were tried by the Inquisition as suspected Jews.

TRACTORS ARE DISPLACING HORSES

One Man and Tractor Doing the Work of One Man and Four Horses

The dockage is separated from this 1000 gram sample by screening with the proper hand sieve or by using an approved cleaning device such as is described under the heading 'Detailed Description of the Method of Determining Dockage.' The dockage so separated is weighed and the percent age is found based on the total weight of the sample including the dockage. If the amount of dockage is below 1 per cent it is disregarded. For example, if only one half of 1 per cent foreign material is so separated no dockage is assessed. This one half of 1 per cent however would not

The percentage of dockage in an essential factor in pricing, at the time value of a lot of wheat. This dockage may consist of either useful or harmful foreign materials.

The various kinds of handling dockage should be carefully investigated and the one that is best suited to the needs of the local conditions should be adopted.

When a large percentage of dockage is present in wheat it is advisable to remove it on the farm or at the point of shipment and thus avoid paying the freight for the dirt chaff weed seeds, etc., on the basis of the rate for wheat.

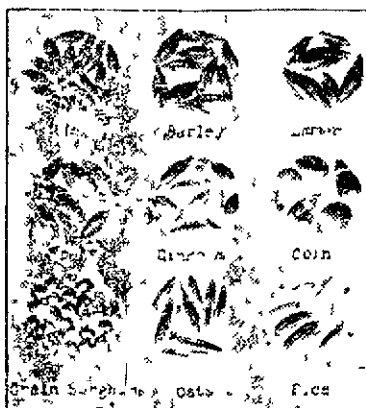

The farmer should get a higher educational grade for his wheat under the Federal system of the Federal grades than he would under a system of grading that does not require a determination for dockage but lowers the grade on account of the total foreign material present in the wheat marketed at country points.

The dockage system in operation protects the farmer from the possibility of low prices fixed by the local buyer in order to insure a safe purchase on a fluctuating basis.

Write the Bureau of Markets, United States Department of Agriculture, Washington for a circular describing the dockage under the Federal Wheat Grades. It will be sent free on request.

In grading wheat under the federal standards one of the fundamental principles is to determine the amount of dockage on a definite free basis. This is done by first removing the sample with a grade later minimum to a mill with a grade roller which will remove a few exceptions to the rule. These are noted in the following lines.

What is dockage? It is the foreign material in a sample of wheat that is graded by the use of up to date machinery. Other than in the case of the approved Federal Standards treatment of wheat it consists of sand dirt weed seed chaff and any other foreign material in wheat that is not of thising nature the result of a pure seed or of an immature condition which are not valuable to the growth of wheat. It is not to the growth of wheat. It is not to be included in the sample. It is not to be included in the sample. It is not to be included in the sample.

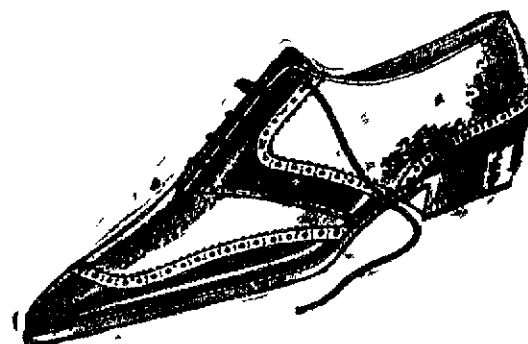

Cereal Grain Seeds.

mate amount of dockage separated for the purpose of that is in the lot of wheat that is to be graded. It is not to be included in the sample. It is not to be included in the sample. It is not to be included in the sample.

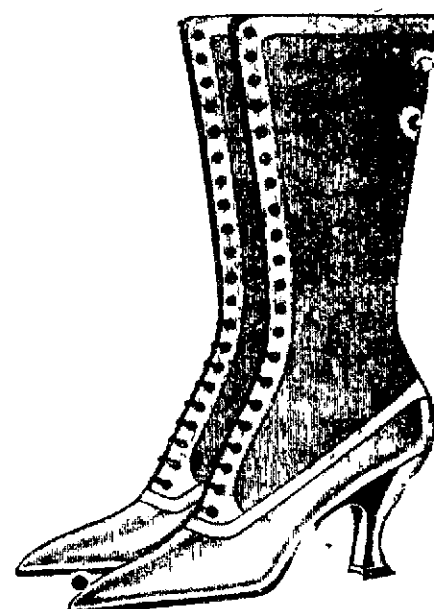

Predominating Foot Wear For Mellow Autumn

The rich, distinctive boot in glorious fashioning for this season we are now showing. Then style is truly fascinating then lines so sprightly that the effect is really exquisite. The "Fairy Rings" of the Field
Green circles in pastures or meadowlands were once thought to be the scene of midnight revels of the faeries. But the rational and scientific explanation of the phenomenon is that the rings are caused by the growth of the solitum man mycelium or fungi, which radiate outward and fresh soil or nourishment. The circles are true because the mushroom has exhausted the fertility of the earth so that grass cannot grow but as soon as the fungi begin to decay the ground becomes fertilized by the rich nitrogenous products of decomposition, and the grass grows greener than ever.

An Eye to Cleanliness
The young English girl thought she could safely speak to the soldier who was marching in the cavalry carriage with her. She had been unable to take her eyes off the rows of medals which spread across his chest and when he told her that he had been a soldier before he had been a soldier her triumph was complete. If she now she urged pointing a confident finger impressively at him 'when were we last washed up on a desert island?'—London Morning Post.

12,000 Women Hear Harding's Address on Social Justice

Twelve thousand women from all parts of the United States went to Marion to hear Senator Harding's address on social justice in which he urged the creation of a Federal Department of Public Welfare to function in defense of maternity, childhood and public health.

INCREASE PROFITS BY GRADING ALL PRODUCE

Farmer Should Sort According to
Size and Quality.

Grade Specifications Recommended by
Bureau of Markets Have Brought
Farmers Materially Where
Practiced

When a farmer or grower boxes or bins his produce, he should expect to receive a better price for it if he grades it according to size and quality. The Bureau of Markets, United States Department of Agriculture, has issued a booklet of grade specifications for various kinds of produce. These specifications are based on the experience of the Bureau and are intended to help farmers to get the best price for their produce.

The same principle applies to the sale of farm produce. If a farmer has a large quantity of produce, he should sort it into different grades according to size and quality. This will enable him to sell the produce at a higher price than if he sold it all together. The Bureau of Markets has issued a booklet of grade specifications for various kinds of produce. These specifications are based on the experience of the Bureau and are intended to help farmers to get the best price for their produce.

WIRE TIGHTENER ON CORNER POST

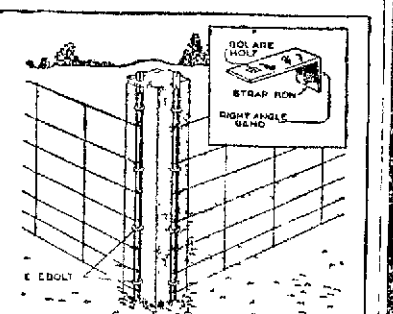

Strands Are Seldom Stretched
Tight Enough to Remain for
Any Great Period.

TASK PERFORMED ANY TIME

Fence Can Be Kept Taut and Adds to
Neat Appearance of Farm—Eye-
bolts Are Inserted in Forms
Before Concrete Is Poured

A woven wire fence is seldom stretched tight enough to remain tight and it is not only a waste of money to stretch it, but it is also a waste of time. An easily made tightener, attached to the corner posts, makes it possible to tighten the fence at any time.

The post-tensioning device is set up on the spot, and the eye-bolts are inserted in each of the outer sides before the concrete is poured. After the concrete has set, the eye-bolts are removed, leaving the eyes protruding from the fence. Two pieces of iron rod, one for the top and one for the bottom, are used. The top rod is placed with a piece of iron rod, and the bottom rod is placed with a piece of iron rod. The rods are inserted into the eye-bolts and the fence is pulled tight. The rods are then secured with nuts and washers. The device is then applied to the fence, and the fence is pulled tight. The device is then applied to the fence, and the fence is pulled tight.

A Net Wire Fence Next to the High-
way Is Good Advertising. This
Tightener on the Corner Posts
Keeps the Fence Taut and Neat-
Appearing

The device is set up on the spot, and the eye-bolts are inserted in each of the outer sides before the concrete is poured. IMPROVE QUALITY OF SILAGE

Feed May Be Materially Bettered by
Using Care in Taking It Out—
Keep Surface Level

The quality of the silage may be improved by the following method. When taking silage out of the silo, keep the surface level. This will prevent the silage from becoming moldy and will keep it fresh. The quality of the silage may be improved by the following method. When taking silage out of the silo, keep the surface level. This will prevent the silage from becoming moldy and will keep it fresh.

The quality of the silage may be improved by the following method. When taking silage out of the silo, keep the surface level. This will prevent the silage from becoming moldy and will keep it fresh. The quality of the silage may be improved by the following method. When taking silage out of the silo, keep the surface level. This will prevent the silage from becoming moldy and will keep it fresh.

SEASON FOR MITES AT HAND

If Hens Are Dropping Off in Egg Pro-
duction It Would Be Good Plan to
Look for Pests

The mite season is now at its height, and if hens are dropping off in production, it is a good plan to look for mites. Mites are small, eight-legged creatures that live on the feathers of the hens. They cause the hens to become itchy and to drop their feathers. If the mites are not removed, the hens will become weak and will not lay eggs. The quality of the silage may be improved by the following method. When taking silage out of the silo, keep the surface level. This will prevent the silage from becoming moldy and will keep it fresh.

INBREEDING IS NOT FAVORED

Experiments in Hens of Amateur Are
Usually Expensive—Many Ani-
mals Discarded

Inbreeding is not favored in the raising of poultry. Experiments in inbreeding are usually expensive and many animals are discarded. The quality of the silage may be improved by the following method. When taking silage out of the silo, keep the surface level. This will prevent the silage from becoming moldy and will keep it fresh.

Inkstand Centuries Old
An inkstand that was probably in
use 2000 years or more has been
acquired by the First Museum. It
is from the time of the Egyptian
and is supposed to date from
about 1700 B. C., although its real age
can only be judged approximately.
It is made of wood and has two
compartments, one for ink and one
for water. The ink is held in a
small cup and the water is held in
a larger cup. The inkstand is
decorated with hieroglyphs and
other symbols. It is a valuable
relic of ancient Egypt.

Newly Painted Windows
To give a new look to the windows
of the building, the windows were
repainted. The new paint is a
bright color and will last for
many years. The windows are
now in excellent condition and
are a credit to the building.

Greece and Rome in Early Days
In the early days of Greece and
Rome, the people lived in simple
huts. They wore simple clothes
and ate simple food. They were
very hardworking and very
pious. They were very brave and
very brave.

Leaning Tower of Westminster.
A curious thing is happening to the
Leaning Tower of Westminster. The
tower is leaning more and more
to the right. It is now leaning
at an angle of 10 degrees to the
vertical. It is a very curious
thing and is a great puzzle to
the people who live there.

M. W. W. Mark and Mr. H. M.
The two men were seen together

LEGAL Intelligence

ADMINISTRATRIX SALE.

Notice is hereby given that the undersigned administratrix of the estate of Isaac Undercoffer, late of the village of Bigler, Bradford Township, Clearfield County, Pa., deceased, will make application to the Orphans' Court of Clearfield County on Monday the 25th day of October, 1920, at 9:30 o'clock, A. M., for a decree authorizing and empowering the said Administratrix to sell at private sale for the payment of debts all the following described real estate:

All that certain lot of ground situated in the village of Bigler, in Bradford Township, Clearfield County, Pennsylvania, bounded and described as follows: Beginning at the Southwest corner of lot No. 3 in the plan of said village and the State Road leading from Clearfield to Phillipsburg, known as Clearfield street; thence running Northeast along said road sixty (60) feet, more or less, to corner of lot of G. B. Thompson; thence Northeast along said lot of G. B. Thompson sixty (60) feet to a corner; thence along lot of said G. B. Thompson Southeast forty-eight (48) feet to lot of Mrs. Thomas Stevens; thence Northeast along lot of said Mrs. Thomas Stevens one hundred forty (140) feet, more or less, to lot of ——— Kyler; thence Northwest along said lot of ——— Kyler one hundred twenty (120) feet to an alley; thence Southwest along said alley one hundred sixty-five (165) feet to state road and place of beginning, having hereon erected a two-story frame dwelling and outbuildings.

Also, one other parcel of land adjoining the above being the rear corner of lot No. 2, and being about fifty-five (55) feet in width and one hundred forty (140) feet in length.

Unless objections are filed on or before said date, after decree is entered sale will be made by W. H. Albert for the sum of fifteen hundred dollars.

ALELIA A. GULICH,

Administratrix.

GOVERNOR SPROUL SAYS WOMEN NOT IN FAVOR OF COX

"Women voters are not for Cox," says Governor Sproul of Pennsylvania and the reasons are not far to find. Governor Cox has alienated the affections of great masses of American women. In the first place, it is generally conceded that his intimate friends knew that in his heart he did not want woman's suffrage and that his statements in favor of this measure were only for political effect.

There are a great many travelling men in this country. They are, as a class, constructionists of a high order. Their intelligent optimism has often held a merchant up past the breaking point helping save his business. These travelling men have devoted wives; the most of them take a great interest in what their husbands are doing. Cox lost what friends he may have had among these good people by his amazingly stupid attack on commercial travelling and the travelling man.

The Text.

"Mabel is engaged to a young man. She's not on her vacation." "That so?" "When is the wedding to be?" "She doesn't know that. She's got to wait and see whether or not he's going to wait to her. It may be that he'll just forget about it, you know."

WIDOW OF ROOSEVELT URGES ELECTION OF WARREN G. HARDING

In Statement Declares Country's Vital Need Is Victory for Republican Candidates.

FIRST BACK OWN COUNTRY.

Says Opportunity Has Come to Women to "Make Her Influence Mighty in Behalf of Nation."

Oyster Bay, N. Y.—Mrs. Edith Kermit Roosevelt, widow of Colonel Theodore Roosevelt, is evincing keen interest in the Republican campaign. She recently gave to the press the following statement urging the election of Harding and Coolidge:

"The country's vital need is the election of the Republican candidates.

MRS. EDITH KERMIT ROOSEVELT.

Warren G. Harding and Calvin Coolidge. Only will the full measure of Americanism in the next Administration be attained, if the people shall declare for the party which holds true nationalism as its high ideal. It is not necessary to forget our duty to our neighbor in doing our duty at home.

"The time appeals most strongly to the manhood and the womanhood of America. To woman more than ever before because to her has come the perfected opportunity to make her influence weighty in behalf of the nation. This year as never before, with world conditions as they are, steadiness and staunchness of American purpose are obligatory if we would first bring back our country to its stable place and then by strong endeavor do all that can be done for peace and the general welfare in all lands."

REPUBLICANS INSURE ECONOMICAL CONDUCT

Washington.—Not one man in ten thousand realizes the enormous expenses run up by the present Government. The disbursements are roughly \$15,000,000 a day, more than a year after the war. In 1914 the people expostulated because the daily disbursements by the Treasury had reached \$2,000,000. How gladly would the people grudgingly under the impositions of profiteers and the burden of taxes welcome a return to these halcyon days? Congress and the new Administration will have to deal with the reduction of Government expenditures.

The same party that has swelled them returned to power will never reduce them, because it claims the government is being economically administered. The Republican party will delight in reducing these enlarged expenses for clerk hire, and the insatiable bureaus that have been built up into money spending machines. By holding in their hands all lines of expenditures the new Congress and new Executive working together will cut down excessive items and eliminate others to an aggregate of hundreds of millions of dollars.

NATION DEMANDS THOROUGH CHANGE.

Chicago, Oct. 19.—If one were required to name a single factor which is doing more than any other to work toward Republican success in November, he would probably have to say: Determination of the public to have a change and to get away from Wilsonism.

Reports from all quarters tell of this feeling, at once a desire for a change and a determination to bring it about at the polls November 2.

Whether it be from the central west, the far west, the east or the south, the reports tell of this seeking for a change. The desire for a change is born of dissatisfaction, dislike and disgust felt by the voters toward the Wilson administration and the things it has done and left undone.

Mr. Cox is looked on as a man who if he were elected would follow the track of Mr. Wilson. In fact, he has declared himself in "complete accord" with Mr. Wilson.

The public, by all accounts, is not looking for a man who will go along with Mr. Wilson or the Wilson policies.

When Shall I Buy My Winter's Bedding? Where Shall I Buy My Winter's Bedding?

We can answer both questions—and, we believe—our answer will prove the best and most satisfactory solution to your bedding problem.

When? NOW! This week quantities are greater than we may expect them to be later on. Buy now and choose from full stocks while there's ample to offer varied choosing.

Where? ROSS & WOODS! Because you have the assurance that whatever you buy here will be good—and worth whatever you pay. We also have some very good reasons to believe that you may buy some mighty good blankets and comforters for as little as you'd pay elsewhere. We KNOW you won't have to pay more, so again we say—

BUY BEDDING THIS WEEK—BUY IT AT ROSS & WOODS!

Warm Friendly Blankets

Gray Cotton Blankets
at \$3 Pr.

These are a light weight blanket—54x76—good and warm. Come in gray only.

Gray Cotton Blankets
at \$3.50 Pr.

Another lightweight blanket—64x80—but a better made blanket.

Gray Cotton Blankets
at \$3.75 Pr.

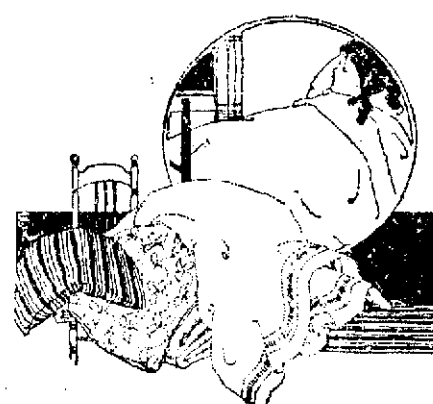

Full bed size—64x76—a heavier blanket and nearly as warm as wool.

Nashua Woolnap
Blankets at \$7.50 Pr.

Here's a warm wooly blanket. Full 64x70—hard to tell it from wool. White bound in pink.

Nashua Woolnap
Blankets at \$8 Pr.

We doubt very much if you'll find their equal anywhere at the price. Warm and friendly—66x80—and come in gray, white and plaid.

Attractive Comforters

Mashua Woolnap
Blankets at \$9 Pr.

Those big Scotch plaids—66x80—and a blanket that will keep you warm o' nights.

Genuine Wool Blankets
at 10 and \$12 Pr.

These are a blanket that are good to slip under on real cold nights. Full bed size and worth more than we ask.

Maish Comforters at
5 to \$11.

We have a great showing of these Maish comforters. There is a goodly variety from which to choose and the prices are very moderate. All are full double bed size.

Quaker Insects.

Several species of insect are commonly found living in the ice and snow of glaciers. Most of them belong to the order of "springtails" and are so minute that they escape the attention of most passersby. On certain glaciers millions and millions of little worms may be seen during the summer, wriggling on the surface of the ice. When the sun is particularly hot they retreat into their holes in the ice, sometimes a distance of many feet.

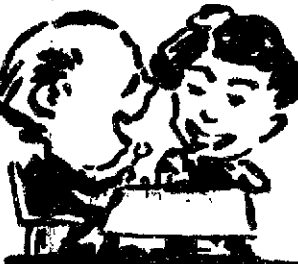

Ladies' Home Journal.

Dress for an Earthquake.

The earthquakes of California, recently reported, remind us of an old lady who, having gone through one, thus relates her experience: "My dear, I was simply tumbled out of bed and the ceiling cracked. I threw on a fur cloak and unconsciously pulled on one black suede glove, and when I got down to the hall and found all the other guests—my dear, I was the best dressed woman there."—Boston Transcript.

JUNIOR RED CROSS WORKING AT HOME

Production of Sound American Citizenship the First Aim, Says Dr. Farrand.

On the badge of every member of the Junior Red Cross are the words "I Serve." That tells the story of the school children's branch of the American Red Cross and its efforts to bring happiness to children throughout the world.

Realizing that the time never was so propitious as right now for teaching the highest ideals of citizenship, the entire present program of the Junior Red Cross has been framed under the very inclusive phrase, "Training for Citizenship Through Service" for others. Since the Junior Red Cross is the agency through which the American Red Cross reaches the schoolboys and the schoolgirls, all its activities are designed to come within the regular school program, and without creating new courses or increasing the number of studies to lend its aid in vitalizing the work of the schools.

"The thing that is needed," says Dr. Livingston Farrand, Chairman of the American Red Cross Central Committee, "is not a perpetuation of the Junior Red Cross, but the training and breeding of sound American citizenship inspired by the true, fundamental ideals of sound democracy. One of the great conceptions in making the Red Cross a contributor to better citizenship in our American democracy is the realization that after all the sole hope of any nation is with the children of the country."

The plan of organization of the Junior Red Cross makes the school—public, parochial and private—the unit, not the individual pupils. Mutual service, helpful community work such as clean-up campaigns, care of the sick, promotion of health regulations, participation in civic and patriotic movements—all these creative agencies designed to translate into life and action the regular school program are parts of the machinery which the Junior Red Cross places at the disposal of the school authorities.

Graded study courses giving practical methods of civic training, supplemented by pamphlets and helpful suggestions, are supplied to the local schools by the Junior Red Cross. An elaborate plan for promoting an interchange of correspondence between children in different sections of the United States as well as with children in foreign lands is being devised and will take a prominent place in the established classroom program.

In promoting the general cause of child welfare, Red Cross courses in home hygiene and care of the sick, first aid, and dieting may be established in all Junior Red Cross Auxiliaries.

The ideals and the objective of the Junior Red Cross are embodied in the pledge of service which the pupil takes when he signs the membership roll and pins on his coat the Junior's badge. The pledge which binds together service and citizenship reads:

"We will seek in all ways to live up to the ideals of the Junior Red Cross and devote ourselves to its service."

"We will strive never to bring discredit to this, our country, by any unworthy act."

"We will reverence and obey our country's laws and do our best to inspire a like reverence and obedience in those about us."

"We will endeavor in all these ways, as good citizens, to transmit America greater, better and more beautiful than she was transmitted to us."

At the foundation of this school program of the Junior Red Cross is a great love for America's children.

RED CROSS ACTIVE IN DISASTER RELIEF

When disaster hits a community—fire, flood, earthquake, explosion, bad wreck or tornado—the American Red Cross can be depended upon to follow right at its heels with help for the stricken people. Red Cross relief is almost immediately forthcoming—food, clothing, shelter and funds; doctors, nurses and special workers with long experience in handling similar trouble elsewhere.

During the last year, ending June 30, there was an average of four disasters a month in the United States. One hundred and fifty communities in twenty-seven states suffered. The largest and most destructive of these were the tidal wave at Corpus Christi, Texas, and tornadoes in Mississippi, Louisiana, Alabama, Georgia, Ohio, Indiana and Illinois.

In these events of horror 820 persons were killed, 1,500 were injured, 13,000 were made homeless, about 30,000 families needed help, the property loss was nearly \$100,000,000 and almost \$1,000,000 in relief funds, not including emergency supplies was expended.

To the sufferers from all disasters during the year, the American Red Cross sent \$120,000 worth of supplies, 110 Red Cross nurses and seven special relief trains. To meet the needs of the stricken, the organization set up ten relief stations, operated thirty food centers and as many emergency hospitals. One hundred and twenty-five Red Cross chapters gave disaster relief service.

If disaster ever strikes this town or county, the citizens can be absolutely sure the Red Cross will be right on hand to help them in every way.

Jack O'Brien and Russell Thorton spent yesterday in Piquette agency. Mrs. Bert Yohne of Piquette spent yesterday shopping in town. Claire Robbins of Tyone spent the day with friends here.

BEE PULLER IS LATE INVENTION

Machine Designed by Californian for Doing This Hard and Expensive Task.

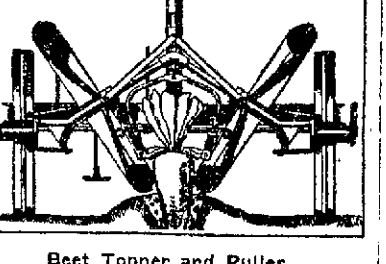

INJURY AVOIDED BY WHEELS

As Beet Is Pulled From Ground Knives on Each Side Cut Off Tops of Leaves—Easy to Harvest Profitable Crop.

Pulling sugar beets is one of the big jobs which confront the grower of this very profitable crop. It is a lot of work, and work that takes time and energy at least, and often costs money as well. A man in the beet fields of California has designed a machine which he thinks is a wonder for doing this hard and expensive task. Instead of using inclined rods, on the principle of the gathering points of a corn binder, for pulling the beets, this man uses padded wheels for this purpose.

Cross Sectional View.

The upright V-shaped portion of the accompanying illustration is a cross sectional view through the padded wheel pullers. The axes of these wheeled pullers extend down to the inner hubs of the main driving wheels of the machine, and are here driven or revolved by these main wheels. Grinders or diggers go along ahead of the pulling wheels, on each side of the row of beets, and loosen the ground around them so that they will be easier to pull when the pulling wheels of the machine engage them. From the drawing it will be noticed that the pulling wheels are set so the lower portions are much closer together than are the upper portions. As the machine passes forward over the beets in a row, these pulling

Beet Topper and Puller.

wheels are rotated backward and upward, and in so rotating they lift beets out of the ground.

Cuts Off Leaves.

So located between the pulling wheels that they pass just over the top of the beet are two knives, one on each side. Thus, as the machine is drawn forward and the beet is lifted up, these knives cut off the top or leaves of the beet; thus it is pulled and topped at one and the same time by the one machine, these being two separate operations in the ordinary hand method of harvesting beets.

FIGURING CAPACITY OF SILO

In Estimating Diameter and Height Allow Each Cow Four to Five Square Feet of Surface.

If your cows are fed 40 pounds silage daily for six months they will need nearly 7,500 pounds or a silo capacity of four tons each. In estimating diameter and height, allow each cow four to five square feet of feeding surface in the silo. Ten cows would require a feeding surface of 50 feet. A silo eight feet in diameter would have a cross section or feeding surface of 50 square feet. For ten cows therefore, a silo should be eight feet in diameter. Fifteen cows should have a silo 10 feet in diameter (if 20 feet high it has a capacity of 26 tons and if 32 feet high, 51 tons); 20 cows should have a silo 12 feet in diameter. Forty cows will need a silo 16 or 18 feet in diameter and about 80 feet high.

TREATMENT OF ARMY WORMS

Pests Can Be Kept Out of Field by Plowing Up a Furrow in Front of Them.

After army worms once get into a field there is nothing practical which can be done to stop them. They can be kept out of a field, however, by plowing a deep furrow in front of them. Plow a furrow about eight inches deep and square up one side of the furrow with a spade. Every ten or fifteen feet in the furrow dig a shallow posthole. As fast as the army worms accumulate in the furrow, and especially in the postholes, sprinkle them with kerosene. Army worms move fast and it is necessary to apply this treatment promptly or they will have moved into the threatened field and there is nothing whatever which can be done. If the trench treatment is applied promptly it proves very satisfactory.

GRAIN FOR EWES AND LAMBS

Unless Animals Are Being Conditioned for Market Pasture and Forage Are Sufficient.

If the ewes and lambs have good pasture and forage crops it will seldom pay to feed any grain feed, unless the lambs are being conditioned for the summer market. Pumpkins planted in the corn field make an ideal supplement for the fall pastures.

Mr. and Mrs. John M. Bannett today for Atlanta where they will spend several days with relatives.

Mrs. Nathan Owen of DuBois today, but mother Mr. Thomas Hoover in Reedsville.

REAL ROOSEVELT ABHORRED WILSON AND HIS WORKS

Yet Democratic Candidate for Vice Presidency Slanders Great Leader's Memory.

MAKING FUTILE ATTEMPT TO WIN ON OLD ISSUES

Fifth Cousin Removed Roosevelt No Able to Convince Followers of T. R. by Specious Arguments.

By SCOTT C. BONE.

Touring the country as a candidate for Vice President, Franklin D. Roosevelt is vainly endeavoring to invoke the progressive spirit of 1912 in support of Wilsonism and the election of the Democratic ticket in November.

What would the real Roosevelt—Theodore Roosevelt—the Immortal T. R.—say to his followers were he alive today?

Gone, he left burning words which tell all too plainly what his attitude would be at this time.

He abhorred Wilsonism, just as he abhorred Danielism, with both of which Franklin D. Roosevelt has been identified as an under Secretary.

Condemned Wilsonism.

Theodore Roosevelt condemned Wilsonism and the whole Wilson administration in unsparring terms.

Read anew what he said at Cooper Union on November 3, 1918:

"I have been amazed because I have criticised Mr. Wilson. I have not said one thing of him that was not absolutely accurate and truthful."

"I have not said one thing of him which I did not deem it necessary to say because of the vital interests of this republic."

"I have criticised him because I believe he has dragged in the dust what was most sacred in our past and has jeopardized the most vital hopes of our future."

"I criticise him now because he has adroitly and cleverly and with sinister ability appealed to all that is weakest and most unworthy in the American character; and also because he has adroitly and cleverly and with sinister ability sought to mislead many men and women who are neither weak nor unworthy, but who have been misled by a shadow dance of words."

"He has made our statesmanship a thing of empty eloquence."

"He has covered his fear of standing for the right behind a veil of rhetorical phrases."

"He has wrapped the true heart of the nation in a spangled shroud or rhetoric."

"He has kept the eyes of the people dazzled so that they know not what is real and what is false. So that they turn, bewildered, unable to discern the difference between the glitter that veneers evil and the stark realities of courage and honesty, of truth and strength."

"In the face of the world he has covered this nation's face with shame as with a garment."

So much for Theodore Roosevelt's opinion of Wilson and Wilsonism in support of which Franklin D. Roosevelt, life-long Democrat, would now invoke the progressive spirit of 1912!

Abhorred Danielism.

And what did Theodore Roosevelt think of Daniel's administration of the Navy Department of which the Democrat, Franklin D. Roosevelt, has been a more or less conspicuous factor and part?

In a speech on "Americanism and National Defense" at Chicago, October 26, 1916, Theodore Roosevelt said:

"More harm has been done to the navy or the politicians in power during the last three years than in the preceding thirty. Whatever good has been accomplished in the navy during the last three years has been done by naval officers, who, in most cases, have been snubbed and punished for their proposals as long as it was safe to do so; whereas Mr. Daniels now turns and claims credit for what was thus forced upon him."

"In short, throughout President Wilson's term there has been neglect or positive maladministration in connection with departmental organization in navy yards, aeronautics, mines and torpedoed, and in all other matters affecting the efficiency of the fleet and the enthusiasm of its officers and men."

The activity and energy of the Navy Department under President Wilson has been primarily concentrated upon schemes aimed at vote-getting or advertising."

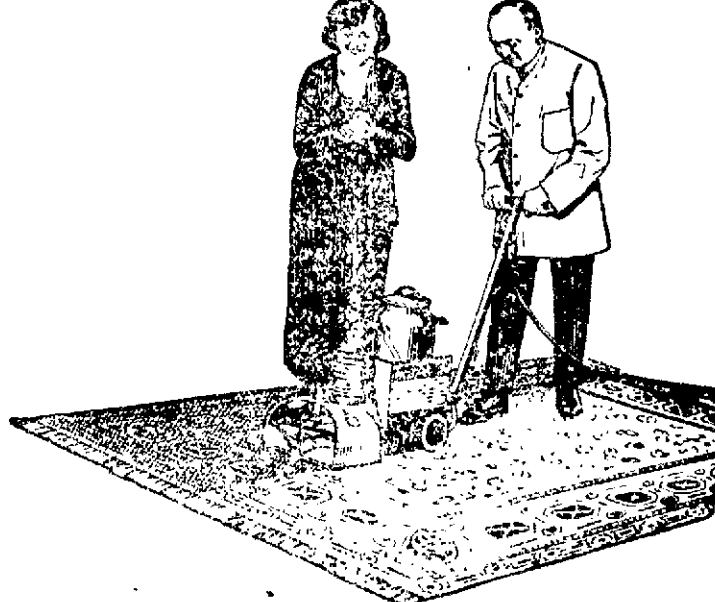

This, then, is what Theodore Roosevelt thought of the administration of the Department from which Franklin D. Roosevelt, Democrat, and exponent of Wilsonism, now would reach the Vice Presidency and have progressives of 1912, followers of the real Roosevelt, help to keep the Democratic party in power and make Wilsonism secure!

It is memorable that any true follower of Theodore Roosevelt will not be misled by a preposterous appeal.

Good News for the modern housewife

Carpets washed and dried right on the floor by the

Hamilton Beach Carpet Washer

Here is wonderful news for the pick-and-pan housewife who has long felt the distress of dirty rugs and carpets. Floor coverings can now be thoroughly, completely cleaned. They can be washed clean—not a new idea, but with the Hamilton Beach Carpet Washer, a newer, better method.

Below is a picture of a rug being washed. And it is a wonderful thing to watch. The residue of mud, grease, and street-trackings which the vacuum cleaner leaves is being washed out. Disfiguring food stains and street blotches are being washed out. Brilliant colors, yellows and reds and blues, seem literally to pop up behind the Washer as it moves forward. All the dirt that covers colors is removed. Every speck of dirt is scrubbed out and whisked away.

Goodness, know what you will think when you see it; it is one thing to watch old, faded floor coverings revived to like newness and freshness. And it is a revelation to feel how soft and downy their texture is, after the Carpet Washer washes out all harsh dirt and mud-glaze.

And it is all done right on the floor, so that you are not depressed by bare, unlighty room while your rugs are in the cleaner! This is how the Hamilton Beach Carpet Washer works! With an action just like a human hand, two sponge rubber brushes, rotated electrically 500 times a minute, scrub the 11-1/2 compound deep down into the fibres of the rug. The mud and dirt and grease are instantly dissolved, and sucked back into the revolving pan. Area in less than an hour the immaculate rugs are ready for immediate service.

Goodness, know what you will think when you see it; it is one thing to watch old, faded floor coverings revived to like newness and freshness. And it is a revelation to feel how soft and downy their texture is, after the Carpet Washer washes out all harsh dirt and mud-glaze.

THE WILSON-COX ACCORD

By Nick West

He used to be
Too proud to fight.
Nobody dare
Deny it.

And when it came
To making peace
He proved too proud
To try it.

Instead of Peace
He sought a League—
A statesmanlike
Abortion;

And now we've neith-
Er Peace nor League;
A Piece of League
Our portion.

THE COLLAR CAME ALSO

By Nick West

There once was a person named Cox,
Who wanted to wear Wilson's socks,
But his friends made a holler
When they found Wilson's collar
Was wrapped in the very same box.

STRIPED BEETLE QUITE HARMFUL

Insect Transmits Bacterial Wilt
to Cucumbers, Squashes and
Other Plants.

SPRAYING IS RECOMMENDED

Insects Prefer Unsprayed Plants as
Food and Efficiency of Control
Would Be Enhanced by Use of
Early Trap Crop.

(Prepared by the United States Depart-
ment of Agriculture.)

Infection with the bacterial wilt of
cucurbits does not occur through soil
or seed. The striped cucumber beetle
and the 12-spotted cucumber beetle are
both summer carriers, and probably the
only means of summer transmis-
sion of the disease in the localities
that have been studied. Introduction
of virulent bacteria into the interior
plant tissues is necessary for infection.

These points are given in a recent
United States department of agricul-
ture publication detailing the results of
studies on the disease, which occurs
in 31 states, including the territory
from Vermont and Canada to Florida
and west to Minnesota, Nebraska, Co-
lorado and Texas. The disease also
probably occurs in parts of California.
Of the common domestic cucurbits the
disease affects cucumbers, cantaloupes,
summer and winter squashes and
pumpkins, but not watermelons.

Use Bordeaux Mixture.

Spraying with strong bordeaux mix-
ture and lead arsenate paste (4-5-50
plus 2) is recommended where the dis-
ease is likely to be severe. Treatments
should begin as soon as the cucumber
plants develop their first true leaves
and should continue at intervals of
about a week until the cucumber beet-
les practically disappear from the
field. In localities where downy mild-
ew is also prevalent the treatments
should be continued later as a partial
insurance against this disease. The
beetles prefer unsprayed plants as
food, and undoubtedly the efficiency of
wilt control would be enhanced if a
slightly earlier trap crop, such as
squash, were planted along the edges
of the cucumber field. The beetles
could be easily poisoned there with a
strong insecticide.

Pulling of wilted vines during the
first part of the season, or as long as
it can be done without mechanically
injuring the healthy plants, will greatly
assist in controlling bacterial wilt
if consistently done in all neighboring
fields. The diseased vines should be
buried, or otherwise removed from ac-
cess by the beetles.

Where a few plants only are grown
in garden plots, screening the hills
with fine mosquito netting will prevent
the appearance of the disease.

Control in Greenhouses.

For control in greenhouses the beet-
les, in the first place, should be kept
out. Do not grow cucurbits nor pile
cucumber refuse in the immediate vicin-
ity of greenhouses, as this attracts the
beetles and many will later find their
way into the houses. If the beetles
once gain entrance to a house filled

Large Cucumber Field.

with growing plants hand picking is
the only remedy to be recommended
until some fumigant is found that will
kill the beetles without injuring the
cucumber plants. Besides destroying
the cucumber beetles, great care must
be exercised in disinfecting all instru-
ments used in pruning wilted vines be-
fore using them again on healthy
plants. This may easily be done with
a bottle of 1 to 1,000 mercuric chlorid
and a sponge.

MULCH IS NOT APPRECIATED

Practice Has Long Been Recognized
as Important Factor in Success-
ful Fruit Culture.

Although mulching has long been
recognized as an important factor in
successful small fruit culture, the
value of summer mulching in the veg-
etable garden is not yet appreciated
by most home-acre gardeners, and it
is not practiced by them as generally
as it deserves to be.

INJURIOUS TO CROWD SWINE

Far Better Plan to Order Additional
Car Than to Pack Too Many
in One Compartment.

Losses of hogs in the past have
proven that it does not pay to try to
crowd a few extra in the car. It
would be far more economical to or-
der an additional car, the freight rate
being no larger than the loss that may
be entailed by the overloading.

Mrs. Fred Leary and little son left
last evening for Greensville where
they will visit relatives.

The KITCHEN CABINET

Perhaps you met griefs in the pasta
and can't help it.
It will never bring solace to cher-
ish them still.
There are rainbow-lined clouds, there
are paeons of gladness
Awaiting your bidding to come at
your will.

SEASONABLE DISHES.

For any meal after breakfast a salad
will be enjoyed. A simple head lettuce
with a French dressing,
which is well seasoned,
adding a spoonful of cat-
sup, Worcester's shir-
sauc and a little onion
juice or grated onion, is
a salad hard to equal.
For variety, roll a half
cupful of fresh, crisp
peanuts, sprinkle with a
finely minced onion over head lettuce
and serve with French dressing.

Waffles.—Two cupfuls of sifted
flour, two egg yolks, two cupfuls of
sour milk, three teaspoonfuls of bak-
ing powder, one-half teaspoonful of
soda, one teaspoonful of salt, and two
teaspoonfuls of melted shortening.
Dissolve the soda in the milk, add the
salt and baking powder to the flour,
add the beaten yolks and shortening;
give a good beating after all the in-
gredients are mixed. Bake on a hot
waffle iron.

Fruit Salpicon.—Peel three bananas,
remove the coarse threads and slice
in thin slices; peel two oranges and
cut in lengthwise slices; remove the
exterior of a pineapple and shred with
a fork to remove the fruit from the
core; skin the grapes, one-half pound
of white ones, and remove the seeds.
Mix the fruit lightly with one cupful
of sugar, the juice of a lemon.
Chill and serve in sherbet cups gar-
nished with maraschino cherries.

Chicken a la McDonald.—Make a
sauce of three tablespoonfuls each of
flour and butter and when well mixed
add one and one-half cupfuls of scald-
ed milk. Cook until smooth, then add
one cupful of cold cooked chicken cut
in strips, three cold cooked potatoes
cut in one-third-inch slices and one
truffle cut in strips. Season with salt
and pepper and serve hot.

Chicken Cooked in Milk.—Cut up a
good fowl as for fricassee, place in a
deep baking dish, season and roll each
piece in flour before placing in the
dish. Cover with sweet milk and bake
in a moderate oven until the chicken
is tender and the sauce cooked down
to a well thickened gravy.

If Back Hurts Begin On Salts

Flush the Kidneys at once when
Backache or Bladder bothers—
Meat forms uric acid

No man or woman who eats meat
regularly can make a mistake by
flushing the kidneys occasionally, says
a well known authority. Meat forms
uric acid which clogs the kidney pores
so they sluggishly filter or strain only
part of the waste and poisons from
the blood, then you get sick. Nearly
all rheumatism, headaches, liver
trouble, nervousness, constipation,
dizziness, sleeplessness, bladder disor-
ders come from sluggish kidneys.

The moment you feel a dull ache
in the kidneys or your back hurts, or
if the urine is cloudy, offensive, full
of sediment, irregular of passage or
attended by a sensation of scalding,
get about four ounces of Jad Salts
from any reliable pharmacy and take
a tablespoonful in a glass of water
before breakfast for a few days and
your kidneys will then act fine. This
famous salt is made from the acid
of grapes and lemon juice, combined
with lithia and has been used for gen-
erations to flush clogged kidneys and
stimulate them to activity also to
neutralize the acids in urine so it no
longer causes irritation, thus ending
bladder disorders.

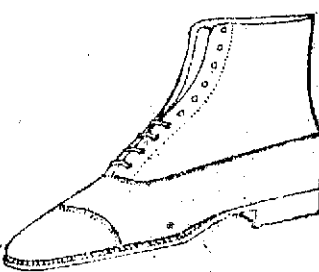

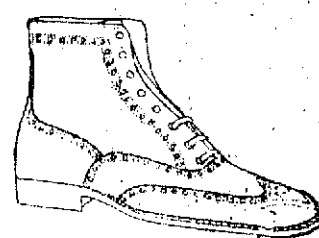

Jad Salts is inexpensive and can-
not injure; makes a delightful effe-
rescent lithia-water drink which all
regular meat eaters should take now
and then to keep the kidneys clean
and the blood pure, thereby avoiding
serious kidney complications

Gossip for Tonight's Tea Table

Miss Anna B. Savage of 303 Pine street has returned to her home after a week's visit with her cousin, Mrs. Ella Dietrich at Hastings.

Harry Bigler Hepburn of Grampian was calling on old friends in town Monday.

Paul Stock of South Second St., has purchased the little old Ford that put Andy McBlain on the blink.

Mrs. Fred B. Leavy and Fred B. Jr., are visiting friends in Greenville and Erie at present.

Mrs. A. B. Leavy and daughter Lil han have returned from Poughkeepsie where they have been for the past week.

A quartet composed of Misses Margaret Bell, Rebecca Smith, Lucille McGee and Mrs. A. P. Kreier motored to Glen Richey last evening, where they sang at a meeting for the benefit of the hospital.

Test in Acoustics.

To test the acoustic properties of a hall, the lecturer proposed counting the number of seconds the clapping of the hands could be heard; if five or six seconds, the hall is unfit for public speaking, for which it must be reduced to two or three seconds, but for musical purposes a little longer may be allowed. Draping the hall is the best way to reduce the reverberation, belief in the efficacy of stretched wires being a mere relic of superstition.

Partial to Gloves.

When Elizabeth was queen of England she was very partial to fine gloves as presents, giving them to her friends and enjoying it very much when they were given to her.

Registering Thermometer.

For industries where temperature records are of value an inventor has devised a registering thermometer that can be connected to and operated by an alarm clock.

Losing Experiment.

"Had you a hard time at the hospital?" "Had I? I lost weight, they gave me a weigh the first thing, and they even took my temperature."

LAUDS HARDING'S WELFARE PROGRAM

Marion, O.—Mrs. Raymond Robins, of Chicago, was the spokeswoman for thousands of women industrial workers and women interested in problems of public welfare who gathered here to listen to Senator Harding's speech on "Social Justice."

Mrs. Robins, who is president of the National Women's Trades Union League, said:

"We have come knowing well that we represent but one of many groups

MRS. RAYMOND ROBINS.

of citizens in America, with necessarily divergent interests, and we understand we must find the way so to relate our various needs and hopes and aspirations that out of such inter-relationship may come the realization of America's ideals, for first and above all we want to serve our country."

"We have always known," said Mrs. Robins, "that certain groups of women are vitally interested in social and industrial questions—but we did not know that the great mass of women, all sorts of women, young and old, from the farms and from the cities—are also interested."

"What is it they see in the call to social justice? They see their opportunity to serve the nation in and through a program dealing with the vital issues with which they are at home, the protection of childhood, the care of mothers and babies, the safeguarding of women workers, the conservation of health and the needs of women on the farms."

"We have listened to a great speech, one of the few great speeches of a decade, and its effect will be far reaching."

Many are for Cox, says George Harvey, because they are convinced that he will not keep his word. It is hard to conceive a harsher criticism of a Presidential candidate—Wheeling (W. Va.) Intelligence.

TRANSPORTATION IS BOTHERING FARMERS

Particularly True in Case of Perishable Produce.

Adequate Facilities Would Enable Producer to Pick His Market and Sell When and Where It Is Most Advantageous.

Regardless of the shortage of labor and other production problems confronting the farmer, the main cause for his not securing the full profits due him can still be traced to insufficient transportation facilities, at the time he must get his crops to market. The farmer who can convert the spoilage on the farm into cash goes a long way toward satisfactorily offsetting everything else eating into his returns.

This is particularly true in the case of highly perishable produce, also that which has a high market value early in the season. Another advantage of adequate farm transportation is that

Gathering Potatoes in Field and Loading on Truck.

It enables the farmer to pick his market. He can sell when and where it will be to his greatest advantage to do so.

The farmers in the potato growing section of Maine have a period of about seventy days to market their crop. The case of one man in Aroostook county and what he did to put his yearly returns in the plus column is not only interesting but typical of how these men solved their haulage difficulties.

This particular grower had a 160-acre potato farm situated seven and one-half miles from a railroad. It yielded about 150 barrels to the acre for a total crop of around 24,000 barrels a year. Road conditions were such that one team of horses could haul but 20 barrels to a load and make but one trip a day to the railroad storage house. In other words, he required 20 teams to haul his crop if he got it to the warehouse in the 70 days between "digging" and snow. Of course all the other farmers of the community were in the same position and naturally none of them could secure anything like 20 teams. Even if they had the loads could not have been handled at the loading platform. Incidentally the haulage cost of the 20 teams would have been \$30,000.

The farmer in question put the problem up to a truck concern. They prescribed a truck for his job. He bought it. This handled 15 barrels of potatoes to the load, made six trips a day and more at night put the potatoes in the storehouse in 70 days and more than paid for itself while it was doing it as the regular haulage rate by teams was 25 cents a barrel.

The motortruck is not a cure-all for every transportation ill, but it has barely scratched the surface as a farm transportation unit. There are innumerable cases of where it can go a remarkably long way to give the farmer more of the profits due him. This story illustrates but one of them.

TO DESTROY JOHNSON GRASS

Crop of Oats or Wheat Will Keep Plants in Weak Condition and Prevent Root Penetration.

If during the early and mid part of summer the Johnson grass can be kept short enough to keep the plants in a weak condition, comparatively few root-stalks that penetrate deep into the ground will be formed. An oat or a wheat crop serves this purpose quite well. When the Johnson grass is in this weakened condition, plowing in August will further weaken the plants and will entirely kill many of them. If the ground then is given clean cultivation until fall, nearly all of the grass that is not killed by the cultivation will freeze out during the winter. In case a good deal of the grass shows up after this midsummer plowing it may be advisable to plow in late fall so as to further expose the roots to freezing.

SOY BEAN GOOD SUBSTITUTE

When Cured in Time Crop Makes Hay That Is Quite Palatable—Yield Is Satisfactory.

It will take two or three years to get back to the normal amount of hay land, and in the meantime the soy bean is one of the best substitutes for the regular perennial legume hay. If cured in time, it makes a hay that is very palatable and at the same time gives a satisfactory return per acre. Probably two and a half tons of cured hay would be about the average yield.

Mr. and Mrs. Abe Meikin left this morning for Philadelphia.

Mrs. Agnes Robinson of West Da- cantin was shopping in town yesterday.
